6,000 Russian Mennonites Seek New Canadian Homes

Now Proposed Large Colony Come From Europe to Prairies

Mennonites Groups Already on Plains Promise Co-religionists Now Stranded in Russia Will Not Be Burden to Country if Allowed to Come and Take Up Farms Between Great Lakes and Rockies.

Winnipeg, Nov. 20.—Proposals that refugee Russian Mennonites be assimilated in the three prairie provinces, there to be supported until they had become settled on the land by Mennonites now resident on the plains, will be made to Alberta and Saskatchewan Governments within a few days, it was learned here to-day. Headed by Bishop Towes of Rosthern, Sask., a deputation of Mennonite leaders which yesterday approached the Manitoba Government, to-day is in Regina.

The delegation proposed, said Hon. R. A. Hoeg, Minister of Education and Acting Premier in the absence of Premier Bracken, that Manitoba take not more than 1,000 of the 6,000 Mennonites now stranded at Moscow. The remainder, he said, would be taken in by Saskatchewan and Alberta if the Governments of the three prairie provinces should decide in favor of the proposal. He and his fellow Ministers had given no indication of what course they might follow, Mr. Hoeg stated.

PROMISE MADE
A promise that the immigrants would not be a burden on the Government was made by Bishop Towes, the acting leader, said. Quite large settlements might follow, Mr. Hoeg stated.

Great Wheat Stores Will Find Market

W. A. Wilson, Canadian Expert in London, Says Europe Will Buy From Canada

Toronto, Nov. 20.—In the light of my experience in England and from reports I have received concerning the wheat supply in other countries, I see no reason why the millions of bushels of Canadian wheat at present in storage should not be sold at satisfactory prices before next year's crop," said William A. Wilson, Canadian agricultural representative in London, Eng., who is a visitor here to-day.

With an intimate knowledge of the wheat situation, Mr. Wilson did not hesitate to say that in his opinion the time had come when Canadian wheat at present filling the elevators in the West, would move toward the great British market.

The Canadian representative declared statistics he had been able to gather on the wheat supply throughout the world all pointed toward big purchases of Canadian wheat before the 1930 crop.

ARGENTINE CROP
"Reports from Argentina show the yield there is lower than last year," stated Mr. Wilson. "It is true continental European countries show increases, but these increases are considerably less than the shortage in Canada."

"It must be remembered," continued Mr. Wilson, "that the Canadian season corresponds to the season in many other great wheat producing countries. What has happened in that Great Britain."

WINTER ARRIVES ON PLAINS WITH ZERO MARKS REPORTED

Winnipeg, Nov. 20.—Black winds from the northwest, carrying with them light snow flurries and a decided promise of further frigid weather, brought winter to the prairies to-day. The thermometers hovered above the zero mark or below. Advice from the local weather bureau indicated an even colder turn to-morrow.

From The Pas, in Manitoba's mining field, came a report of the coldest weather west of the Great Lakes. Six degrees below zero was registered at The Pas, but southern Manitoba suffered from almost as intense cold. The early morning temperature in Winnipeg was recorded as three below zero,

Liquor Storm Is Growing In Washington

Now E. E. Denison, Member of House of Representatives, Faces Trial

He and His Former Secretary Say Prohibition Agents Making Mistake

Washington, Nov. 20.—The indictment of Representative Edward E. Denison of Illinois by a federal grand jury on a charge of possession of liquor has added new force to the storm raging over prohibition enforcement in Washington.

A leaking suitcase and a trunk containing liquor, addressed to John Layne, in care of Denison, 411 House Office Building, were the bases of the indictment, which also names Layne, who was his secretary nine years ago. Denison said the indictment had resulted from a mistake and Layne disclaimed any connection with the case.

AFTER PANAMA
The grand jury's action yesterday followed a report by prohibition agents November 8 that they had found a leaking suitcase at the Union Station and a trunk containing liquor at Denison's office last January 19, after Denison had returned from a visit to Panama.

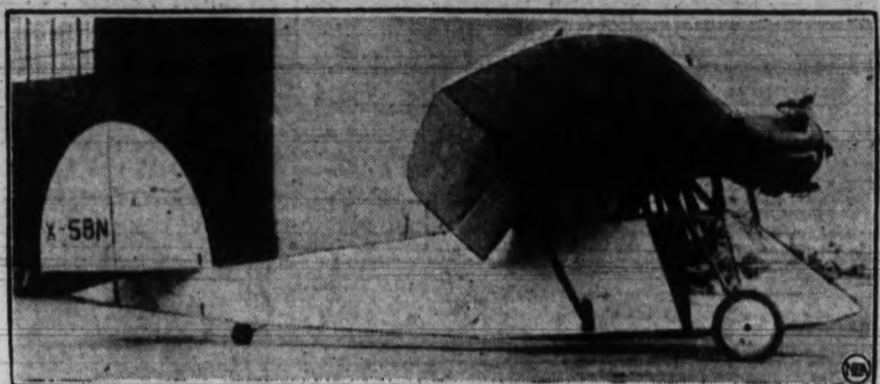

Advice that Saanich is not responsible for payment of high school fees, for fourteen second-year students resident in Saanich who have been admitted to Victoria High School, un-equipped with official Saanich credentials, was tendered the Saanich School Board last night by Heisterman and Tait, solicitors to the board. The trustees instructed the legal firm to notify the city authorities that the Saanich School Board refuses to admit liability for students taking second-year studies as a result of passing supplementary tests.

ONE LIFE LOST WHEN PLANE FORCED DOWN ON OCEAN

Terra Nova, Pausanias, Sicily, Nov. 20.—It was reported here to-day that a seaplane en route from Ontario, the support of Rome, to Sardinia had been forced down in the Mediterranean. One man was reported to have lost his life and a number of others slightly injured. Among the latter was Angelo Manaroli, Under-Secretary of War.

New Safety For Air Travelers

One of the few planes of revolutionary design entered in the Guggenheim Safe Aircraft Competition soon to be decided in New York is the strange-looking craft with sharply curving wings pictured above. The pitch is automatically changed during flight, straightening out at high speeds and increasing to the curve shown above, to prevent stalling at low speeds. The glass-enclosed cabin and the overhead mounting of the motor are features. It is a Schroeder-Wentworth plane for two passengers.

Australia Is Turning Plane Pilot From Conscription

WINTER FAIR AT TORONTO IS OPENED

Toronto, Nov. 20.—With entries in the neighborhood of 30,000 in the various departments, ranging from goldfish to horses, the eighth Royal Winter Fair was opened here to-day.

TUG CAPTAIN LOSES HIS LIFE IN VANCOUVER

Believed E. L. Mitchell Suffered Skull Fracture After Taking Opiate

Vancouver, Nov. 20.—His skull fractured and with two envelopes which apparently had contained venereal disease, E. L. Mitchell, tugboat captain, was found unconscious at 1:45 p.m. yesterday in his room in a hotel on East Hastings Street here. He died at 3 p.m. and was removed to the city morgue for an autopsy.

Police advance the theory that the man, under the influence of the opiate, may have accidentally inflicted the injuries believed to have caused his death. The body was removed to the city morgue for an autopsy.

George Poulin, proprietor of the hotel, according to the police, stated Mitchell had entered the hotel Monday at 3 p.m. and declared he was going to bed and did not wish to be disturbed.

HEARD BREATHING
Passing Mitchell's room Tuesday afternoon, Poulin said he heard stertorous breathing. He became suspicious and failing to obtain a response to his knocks on the door, entered and found the man unconscious.

Medical aid was summoned and Mitchell was removed to the hospital. No indications of a struggle or marks of violence on the body were found, police declare.

Capt. Mitchell had resided at the hotel for five years. Mrs. Mitchell died three weeks ago in Seattle, police say.

WITH SOME DRIVERS, WHEN THE ROAD TURNS THE SAME TIME THEY DO, IT'S A COINCIDENCE.

Australia Is Turning Plane Pilot From Conscription

Canberra, Aus., Nov. 20.—In the speech from the throne opening the first session of the new Australian Parliament to-day Lord Stonehaven, Governor-General, said it had been decided by the Government to ask Parliament to replace compulsory military training in the Commonwealth with a voluntary system. The same organization heretofore in force would remain, however.

No decision had been reached regarding a separate organization for the Commonwealth air force.

The Government would introduce a measure to maintain the federal labor arbitration machinery, it was declared.

LARGE MAJORITY
Parliament opened with the new Labor Government of Hon. James Henry Scullin in power by an overwhelming majority received in the general election last month.

Clean-up In Vancouver May Soon Be Seen

Vancouver, Nov. 20.—Further consequences may follow evidence given by taxi drivers before the B.C. Minimum Wage Board here yesterday.

It was learned to-day that the information about underworld conditions revealed to the board may be forwarded to the police commission.

Taxi drivers seeking the establishment of a living minimum wage stated openly that many of them had to indulge in theft, bootlegging and toutage for disorderly houses to make a living.

Individuals confessed their own activities with respect to all three kinds of violation of the law. Members of the commission are now considering whether this evidence should not be passed on to those charged with responsibility for administration of the law in Vancouver.

SOVIET ATTACK IN MANCHULI AREA CONTINUES

Harbin, Manchuria, Nov. 20.—A Chinese military wireless message from Manchuli to-day said Soviet artillery heavily bombarded the Manchuli-Dalainor sector yesterday.

A Chinese dispatch from Kharin said there were 300 Chinese casualties, while aeroplanes bombing Chekiang set the station there afire. The coal sheds at Dalainor were said to be burning.

A heavy mantle of snow thrown over Manitoba earlier this week gives a Christmas-like aspect to the province, but there is little snow in Alberta and Saskatchewan.

With zero and near-zero temperatures prevailing in Saskatchewan weather officials here reported only one instance of sub-zero weather. Prince Albert residents shivered this morning in a temperature two degrees below zero, while Lethbridge, Alberta, recorded one degree below zero.

Missing Near Ships In Ice

Word Awaited From Carl Eielson in Northeastern Siberia

Nome, Alaska, Nov. 20.—Word that Pilot Carl Eielson, who, assisted by Pilot Frank Dorbandt, is attempting to rescue passengers from two ships icebound near North Cape, Siberia, had been seen by natives flying within sixty miles of the Nanuk, one of the vessels, was received here to-day. Information was also received that his motor had been heard within fifty miles of the ship by a Russian trapper.

It was so foggy, however, that the trapper did not see the plane, the report said.

This information, although meagre, dispelled the recent report that wreckage of Eielson's plane had been seen near the Nanuk and revived the hope that Eielson might be rescued soon.

FIGURES SHOW GREAT DROP IN STOCK PRICES

New York Exchange Sums Up Activities During Recent Decline

New York, Nov. 20.—The New York Stock Exchange to-day announced the total market value of listed shares had declined \$15,320,978,518 during October to a total value as of November 1 of \$71,752,650,908. The average price as of November 1 was \$94.62 a share, against \$83.08 on October 1.

This reduction of approximately twenty per cent in the total value of New York Stock Exchange stocks falls to reflect the further drop during this month. The average of the decline since November 1 is illustrated by the fact that the Standard Statistics Company-Associated Press price index of fifty industrial stocks dropped from 192.8 at the beginning of the month to a low level of 141.2 on November 15. It has since rallied to above 165. From October 1 to November 1, the period covered by the Stock Exchange figures, this index declined from 236.3 to 192.8.

COMPARED WITH SEPT. 1
The total valuation of \$71,752,650,908 as of November 1 compared with approximately \$87,073,000,000 on October 1 and the high record reported by this tabulation of \$89,668,000,000 on September 1.

With the decline in loans to brokers during October of \$2,440,559,111 to \$6,108,824,868, the total borrowings of Exchange members on November 1 amounted to \$4.1 per cent of the total value of all listed stocks, as compared with 9.82 per cent on October 1, a decrease of 1.31 per cent.

B.C. APPLES WIN FIRST PLACE AT TORONTO FAIR

Toronto, Nov. 20.—With a box of Delicious apples exhibited by the Associated Growers, British Columbia to-day carried off the first sweepstakes award of the Toronto Royal Winter Fair, that for apples. Ontario had two entries in the sweepstakes class, with McIntosh and Spys.

Moscow Reds Are At Work In South Africa

Outbreaks Among Natives Traced to Urgings of Third Internationale

Minister of Justice Tells of Attacks and Threats Against Police

Pretoria, S.A., Nov. 20.—(Canadian Press Cable Via Reuters).—The definite charge that the activities of the Communist Internationale are behind the widespread unrest among natives in the Union of South Africa was made in the course of a long address by Hon. Oswald Pirow, Minister of Justice, here last night.

Numerous organizations closely allied with, or at least in touch with, the Third Internationale were responsible, the Minister stated, for fanning the unrest which came to a head at Durban recently when the Government was forced to raid the native compounds and arrest 600 out of 6,000 natives who had refused to pay the poll tax.

The Minister also declared that unless the danger was checked strongly by the police, rioting on a large scale would be suffered within twelve or eighteen months.

ATTACKS ON POLICE
He described the seething unrest at Durban before the raids of last week. The borough police had been attacked.

Bank Robbed In Quebec

Montreal, Nov. 20.—Three armed and masked men this afternoon walked into the office of the Canadian Bank of Commerce at St. Chrysostome, Que., about thirty miles from Montreal, tied the manager and cashier to chairs and escaped with cash estimated at \$30,000. The bandits, who had prepared their way by cutting telephone wires, drove off in an automobile.

No Foreign Judges In China After January 1

New York, Nov. 20.—The Kuomintang Agency here to-day stated it has been urged by Dr. C. T. Wang, Minister of Foreign Affairs of the Nationalist Government of China, to "let the world know China is determined to abolish extra-territoriality on January 1."

The Foreign Minister was quoted as saying China no longer could tolerate continuance of foreign privileges which placed the Chinese people at a disadvantage in their own country and therefore nothing would be left undone properly to terminate all infringements of China's sovereignty.

He added that the powers had learned China no longer was a negligible influence in world affairs and consequently "we have every confidence our persevering efforts will achieve our object."

STUDY IS MADE BEFORE PLACING OF NAVIGATION AIDS

Vancouver, Nov. 20.—Recent serious accidents to deep-sea shipping in the Strait of Juan de Fuca near Victoria have again drawn the attention of shipping to the need of further aids to navigation there.

The shipping section of the Vancouver Merchants' Exchange has appointed a committee consisting of Captain E. Alkan, Captain H. P. Harrison, Commander E. L. Johnson, R.N.R., D.S.O., and Stanley McKee to study the situation and make representations for further necessary aids in those waters.

Fundy Quake Shook Liner Far Out At Sea

CABLE REPAIR SHIPS ARE BUSY AFTER QUAKE

New York, Nov. 20.—Six cable repair ships were groping the bed of the North Atlantic off the coast of Nova Scotia to-day for cables broken on Monday by the earthquake along the seaboard. Ten or more of the connections between North America and Europe were severed by the upheaval among the hills and valleys of the ocean's floor.

Nothing sighted
Captain W. H. Parker, commander, said he was in the chart room when the ship started to tremble.

"I immediately went on the bridge," he said. "Nothing had been sighted ahead and nothing seen astern. For a moment I thought we had cast a propeller blade. The engines continued to work smoothly, however, so I began to fear we had struck a submerged wreck. When the vibration ceased I went aft to examine the wake of the ship for signs of wreckage, but there were none."

The vibration was so severe, Captain Parker said, that it shook out the electric lights in the main room. Stewards and passengers rushed to the promenade deck to find out what had happened.

"The lookout man in the crow's nest," said Captain Parker, "said it felt as though the engines had been put full astern. The junior engineer in the forward stokehold said it was as though the anchors had let go and the chains had rattled out of the hawse pipes."

NO DAMAGE FOUND
"The carpenter very carefully sounded the ship fore and aft, and with an officer, examined No. 2 hold and the tank tops and found everything in order. The walls were dry and there was no sign of damage in the hold."

"I was then forced to consider the possibility of an earthquake and discussed this with my officers after they had reported all well below. But I was not sure until we received radio reports Monday night."

Pastor Tells Tragic Story Of Accident

Rev. Samuel Lundie Describes to Jury Horror of Shooting His Friend

Verdict of Accidental Death Is Returned After Short Deliberation

With sobs choking his voice, interrupting the sad details of his story, Rev. Samuel Lundie, pastor of the Knox Presbyterian Church at Sooke, yesterday told a coroner's jury how a shot fired from his rifle killed one of his best friends, Louis Godtel, in the woods near Otter Point on Monday afternoon.

The tall, dark minister, under a terrific strain, broke down and wept freely as he related how the fatally injured man expired in his arms.

The jury deliberated only a few minutes before returning a verdict of accidental death. Only two witnesses were heard, Constable D. Tweed, who supplemented the story of the tragedy told by the Rev. Mr. Lundie. The inquest was held at McCall Brothers Funeral Parlor, Coroner E. C. Hart presiding.

NOT SO CAREFUL

In his evidence, the Rev. Mr. Lundie revealed that, owing to the open season on deer at the present time, his usual carelessness as an experienced hunter was relaxed during the trip which led to the death of his friend. It was unnecessary for him to determine if the animal he was shooting had horns and this fact probably accounted for the tragedy.

At the outset of his story, he referred to his close association with Mr. Godtel.

"Since I came to Sooke eight years ago, I had lived next door to Mr. Godtel. For several years he and I had hunted together."

He then described how the pair had arranged to go hunting on a fine day in November, how he had visited the Godtel home on the morning of the tragedy and decided to go out in the afternoon.

"I brought my car along and we proceeded along the Sooke-Jordan River Road and left the car at a ranch, then going into the bush," he continued. "We went through the

SAVED IN CRASH OF BIG PLANE

A German prince and a distinguished British naval officer alone survived the crash of a giant Berlin-to-London passenger plane in which six persons were killed near Marden Park, England. Prince Eugene von der Schaumburg Lippe, lower right, a relative of the former Kaiser, and second pilot of the plane, was seriously burned, however, and Lieut. Com. R. G. Glen-Kidston, retired, lower left, received severe cuts and bruises. The Luft-hansa tri-motored plane, like the one pictured above, crashed after striking a tree-top in a dense fog.

woods and then started up the side of a mountain.

"While proceeding up the mountain, Mr. Godtel suggested we separate. 'I'll go to the right over by those rocks and you continue upwards, bearing to the left.' I waited till he had gone 200 yards or so and then I went in the direction he had told me."

"When I came to the top of the rise, there was a little depression in front of me. Opposite, up the slope, there was a lot of broom."

"I heard a noise and saw the broom move and a shadow underneath. Feeling sure that Louis was over on the rocks to the right and that it must be a deer I put the rifle to my shoulder and, knowing that all kinds of deer were in season, I was not as careful as I would have been if only bushes had been lawful game, and without taking very definite aim, the rifle discharged."

"Even then I was sure it was a deer. But when I got through the brush—I was horrified to find—I had shot him."

"I laid back his head in my arms to try and make him comfortable, but he breathed his last."

The Rev. Mr. Lundie then told how he had picked up both rifles and carried them to the car, proceeding back to his home where he told his wife to phone the police and then gathered a party of men to go back to the scene of the tragedy.

Constable Tweed, in his evidence, described how the body had been found across a sheep or deer trail leading through the broom. It was about three-quarters of a mile in a direct line from the road and about twice that distance through the bush, he said.

The rifle, which the Rev. Mr. Lundie said was the one which fired the fatal shot, was produced by the Constable. It was a 30.30 carbine.

Coroner Hart, in charging the jury, said the facts of the case appeared very clear. It was very unfortunate that such accidents should have to occur every year no matter what precautions were taken.

Auditorium-Rink Sure of All Year Use

Dual Purpose Building Gains Support at Chamber of Commerce Meeting

Building Trades Council Offers to Assess City's Craftsmen For Stock Purchases

Pointing out that conventions prolong the tourist season as they can be held before and after the school summer holidays, and that Victoria has no hall capable of accommodating more than 1,500 people, C. F. Hill, chairman of the auditorium committee of the Chamber of Commerce, yesterday afternoon, called for suggestions at a well-attended meeting at the Chamber of Commerce.

He favored erection of a hall seating at least 3,000 people, and showed that the extensive advertising by the railway companies, the addition of several large steamers to the ferry service, made the prospective business available of great importance.

Mr. Hill considered that a skating rink to replace the Arena, and a parking system for motors, were capable of consideration in connection with study of the auditorium problem.

CIVIC GUARANTEE

Alfred Carmichael said the destruction of the Arena had unified all minds in support of a combined auditorium and skating rink, and a request for a civic guarantee for bonds of such a project would be warranted. "The sooner we get at this problem the better," he said.

Joseph Patrick said combination of skating with an auditorium would prove unsatisfactory in practice. An ice rink would be "too much like a barn" to be popular as an auditorium, he said.

Mr. Hill said data obtained showed auditoriums had cost from \$1,000,000 to \$2,000,000. Particulars were presented of a Portland hall, within six blocks of the centre of the city.

This data showed that a cost of \$600,000 was involved in a municipal skating 3,500, erected with a municipal bond issue. The revenues did not

FINDS VICTORIA PLEASANT PLACE

Vice-president of Soo System Is Enjoying Sunshine and Golf Here

When C. T. Jaffray, president of the Soo Line, went back to Minneapolis, Minn., last summer he spread the gospel of the Pacific coast and put in a good word for Victoria.

A. W. Wallace, vice-president of the Soo system, heard about the attractions of this city and made a mental note of it.

Mr. Wallace is now basking in Victoria's bright November sunshine, forgetting business and playing golf.

Even to be interviewed interested with his pleasurable time here and he disposed of his interrogator courteously, but firmly, with the expression that he was enjoying himself immensely and proposed to remain in the city for a few days longer to more fully appreciate the excellent golf facilities available here.

"I came out here for a rest and I am getting it," declared Mr. Wallace at the

New Ambition For All Past Forty

Says Vigor, Energy, Ability, and Healthy Vitality Should Not Be Confined to Youthful Days

Most people, from childhood, carelessly disregard and neglect their nerves. At forty, or thereabouts, they begin to pay the penalty. They lose ambition, life's youthful pleasures seem to pall, they tire easily, can't concentrate, have fits of blues and trembling, get nervous headaches or dyspepsia and lose their pep and full, firm grip on life.

Depleted nerve force is dangerous, and nerve prostration awaits those who disregard its early warning. But now, thanks to modern medical science, nerve force may easily, safely and quickly be brought back to normal so that men and women of forty, fifty, sixty or even older, may again enjoy the youthful nerve strength, vigor and energy of half their age.

A preparation known as Erbac (double strength) is now being stocked and highly recommended by leading druggists everywhere. Not a cure-all, gland treatment, or habit forming stimulant, but a positive nerve food and vitalizing agent. A twenty-days' use of Erbac (double strength) is guaranteed to bring a tremendous increase in nerve force and energy to any man or woman past forty, or its cost will promptly be refunded.

No fairer offer was ever made. To prove you can be young—stay young—strong—vital—costs but 10 cents a day, if you succeed—not a penny if you fail. Have you the courage to make the test? Then ask your druggist for a sealed package of double strength Erbac and begin to-day.

NOTICE TO READER—Above money-back guarantee is absolutely genuine and legal. Manufacturers are responsible.

(Adv.)

MEMBERS OF POLICE DEPARTMENT FACE CAMERA IN FRONT OF HEADQUARTERS

A Sensational Sale of

NEW

Winter Coats

Extraordinary Values at

\$29.75 and \$34.75

The unusual warm weather that has prevailed all over the East has influenced coat manufacturers to grant us very unusual concessions, which made possible these remarkably low prices.

\$29.75, \$34.75

Handsome Coats, fashioned in the lines of the new silhouette—side flares, front flares, back flares—also some in straightline styles. Luxuriously trimmed with collars and cuffs of caracul, skunk, marmot, opossum, badger, wolf and kit fox. Sizes 14 to 20 and 36 to 44; in all shades.

**Drastic Reduction
of 100**

**French Room Hats
At \$5.75**

Every Hat styled to the season's new requirement and drastically reduced to \$5.75.

The Princess Silhouette

Gives the Illusion of Height and Slenderness to Daytime Frocks

\$14.75 and \$24.75

The princess silhouette is almost universally flattering—for the slender woman and for the woman who is not so slim.

The irregular hemlines, the deft ways in which slenderness is accentuated, the pert little bows, the unusual collar and the interesting shirrings mark these frocks as very new. Our liberal charge account, which we open at once for you without extra cost, whatever, may be of service to you.

Mining Brokers Defend Bucketing Practices As Good For Market

They Admit Short Selling Against Customers Is General on Canadian Exchanges; Customers Lose Money, They Say, But It Goes Into Brokers' Pool, Where It Can Be Put to Good Use.

Toronto, Nov. 20.—Margin houses, members of the Standard Stock and Mining Exchange, who make a practice of short selling for the account of the house when their customers buy, defend the practice of bucketing buying orders from customers. The head of one of the largest houses frankly admitted that his house often carries as little as one-third of the stock shown on his clients' ledger sheets. On the balance of the customers' purchases, carried by the house on margin, the house will have taken a short position in the market.

This broker was informed that The Financial Post intended to take a very strong stand against this practice by bucketing orders on the ground that it is "unethical, economically unfair to mining speculators and a detriment to the Canadian mining industry. He was invited to express his viewpoint on the matter as it was desired that the readers of The Post should have both sides of the question before them. He said:

"Short selling by brokers is absolutely essential to the development of the mining security business in Canada. Without such short selling the public would lose a great deal more money than it now loses and speculation in mining shares could never have reached its present proportions.

SMALL AMOUNT OF CREDIT
"There is only a small amount of money available to finance trading in mining stocks. The banks have put up some money for call loans on mining shares and private money can be had in limited amounts. But the total sums are not large in comparison to the insatiable appetite of the public for speculation in mining stocks.

"The banks will loan us fifty per cent on certain mining stocks and nothing at all on others. We allow our clients to deal on a one-third margin.

"We have to provide some manner of bridging the gap between the margin the banks demand and the margin we allow and we have to find some way of financing the amount of speculation that goes on in excess of the amount that could be carried on with the credit resources available. The only way that it can be done is by having a large short interest in the market. As the public does not do much short selling in the mining market we have to do it.

ENLARGE SPECULATIVE MARKET
"By entering into short transactions we provide facilities for a much larger degree of stock mining speculation than would otherwise be possible.

"Then there is another advantage. Our short selling helps to maintain stability in the market. If there were no short selling the public buying would 'go up' and 'go down'—the inevitable reaction came the public would lose tremendous sums because, after going higher than they now go, stocks would drop much lower than they now drop. When we cover our short transactions we bring buying power into weak markets. Just now the best mining stocks would be selling at prices far below their present levels if buying by brokers were not providing a measure of support. Brokers have provided millions of dollars of buying power at these levels. Our transactions provide a seller for every buyer and a buyer for every seller. Thus we give stability to the market."

ITS RELATION TO MINING
This question was then put to the broker by The Financial Post. "The net result of the public speculation in mining stocks bought at the top and sold out at the bottom is that the speculators lose a great deal of money and the brokers make a great deal of money. How then does this speculation help mining? What relation have these transactions to the mining?"

"The money that we brokers are making is the money that is developing the Canadian mining industry," said the broker. "A large share of the money invested by the public in mining shares traded on the exchange goes into the treasury of the companies themselves. And a large share of our own profits goes directly into the development of properties all over Canada. Consider our own house. We have done well; we have made a great deal of money both in commissions and in profits on our short sales. We have financed a great many properties. We have taken hold of promising properties that were moribund because of lack of capital and we have given

them the money to go on with further work. We have done this in a great many cases without asking the public to put up a nickel. We have plunged into this money in the original stages of these properties and often where we have gambled we have lost every cent.

"We take a great deal of pride in what we have done for the development of Canadian mining by the investment of our own funds.

OPPOSES TOUTING
"The public loses a lot of money by speculation in mining shares. A lot of that money comes back to the brokers. In their hands, it forms a sort of gigantic pool from which Canadian mining development is financed."

AUSTRALIA HAS CUT BORROWINGS

Sydney, Nov. 20.—The annual burden of Australian loan interest, which has reached \$300,000,000, has caused the Australian Loan Council to slow down the rate of its new borrowings. As a new country with vast resources to develop, Australia has necessarily been a heavy borrower. Roads, railways and other public works have had to be undertaken that have placed a tremendous burden on the 6,000,000 inhabitants of the country. The federal and state governments have been spending annually about \$200,000,000 of loan money, but this year's expenditure has been cut down to \$112,000,000. Such a cut for money as the Queensland state trading concerns, which have been losing millions of dollars, are being eliminated, and in other directions also a severe curb is being placed upon loan expenditures.

NARROW ESCAPE
Prince Albert, Sask., Nov. 20.—Kheel Nelson, Saskatoon, narrowly escaped death here yesterday when his car was struck at a level crossing in the heart of the city by an incoming Saskatoon Canadian National train and practically demolished. Nelson sustained only a cut on the right hand and a few bruises on the body in spite of the fact that the car was crushed almost beyond recognition. The twisted wreckage had to be torn apart to extricate him. The automobile was dragged 100 feet.

EUCARISTIC CONGRESS
Vatican City, Nov. 20.—Dublin was chosen to-day for the 1932 Eucharistic Congress.

COAL AND STEEL TRADE STUDIED

London, Nov. 20.—Right Hon. J. H. Thomas informed the House of Commons at question time yesterday that he had had a number of further consultations with coal and shipping interests concerned in the increased sale of British coal in Canada. These had raised a number of questions which would require careful consideration, and consequently he would make no further statement at present.

In regard to steel, the Minister said the industry was following up its export opportunities in Canada. But it was clearly impossible to estimate the probable amount of sales within the next year.

Asked if he would consider training men and women for farm work in Britain instead of Canada, Mr. Thomas said he was already examining this question so far as men were concerned. He was satisfied, however, the questions of training persons for work in Canada and in Britain were separate and did not necessarily conflict with each other.

MANY GO TO FAMOUS SHRINE

Montreal, Nov. 20.—Brother Andre, now silver-haired and in his eighty-fourth year, yesterday knelt praying in a little wooden building beside the imposing crypt of St. Joseph's Oratory, which he founded a quarter of a century ago, while within the crypt Cardinal Rouleau, Archbishop of Quebec, assisted by a distinguished group of Roman Catholic clergymen and in the presence of more than 4,000 people, paid sacred tribute to the man who prayed alone and to his patron saint, St. Joseph.

Yesterday was the twenty-fifth anniversary of the opening of the oratory, which has become one of the most famous shrines in the world. Brother Andre declined to be present at the pontifical high mass chanted in honor of St. Joseph and himself and retired to the confines of his modest prie-dieu, praying to St. Joseph to relieve the mental and physical distress of the pilgrims who earlier in the morning had implored his aid. The venerable brother was made the recipient of many messages of congratulation. Letters and telegrams arrived for him from all over the continent. He dismissed them all, however, with the simple declaration: "I have only done the work of God and of St. Joseph."

Since 1904 he has been visited by

thousands of ill, maimed and mentally distressed of all walks of life.

EARTH SHOCKS IN TENNESSEE

Nashville, Tenn., Nov. 20.—Sharp earth shocks were reported felt in the western section of Nashville at 9:35 last night. Residents said the tremors lasted a few seconds and jarred windows of homes and caused considerable apprehension. No damage was reported.

A lesser quake was felt in other parts of the city at 6:55 p.m.

Hauling a sled over twenty to forty miles of snow and ice a day is nothing out of the ordinary to an Eskimo dog.

NEW COTTON PLANS

Rio de Janeiro, Brazil, Nov. 20.—Japanese enterprise is entering the cotton manufacturing industry in the Amazon Valley, according to Irige Guchina, official of one of the largest Japanese cotton manufacturers. The cotton of Ceara is used extensively by European mills. The Japanese plan, instead, is both to raise cotton and manufacture it into cloth in Brazil. Guchina says. His company also will raise and manufacture silk. The industry was started several years ago in Sao Paulo with worms and mulberry shoots from Japan and has prospered.

BOY SCOUT LEADERS TO MEET

Vancouver, Nov. 20.—The annual provincial council meeting of the Boy Scouts' Association will be held December 7, starting at 8 p.m., in Boy Scout

Association headquarters here, according to the decision of a provincial executive meeting at headquarters last night.

THE WOMAN'S DAY

By ALLEN SUMNER

The Junior League is to be commended for its campaign against tardiness and early closing hours for dances.

The League started propaganda for this last season, and this year has actually passed resolutions that luncheon and dinner hostesses should seat their guests promptly and dance hostesses should observe an early closing hour—from two to three in the morning.

A large group of parents have campaigned for this in vain for years. But for a parent to campaign for early hours is as obvious as it is for the poor to strike for higher wages. A parent, the natural enemy of gaiety

and late hours, has not nearly so much weight with young people, as an organization composed of the Social Registerites and the wealthy girls of the country.

LEVEL HEADS

Certainly if there is any set of girls in the land who could dance all night and sleep all morning, and not have to worry about stern bosses, or slips in the envelope, it is the Junior League.

Yet a large number of these girls actually hold jobs, many of them frankly say they want the money, and others who do not work for pay, do much social service and community work which gives them a busy day.

And they are a level-headed group. One of them who talked to me about the early closing hours for dances was quite frank about what the real "inside" was.

"It's the men," she said frankly. "You see, the ones that are the blue stocks, matrimonially, all work—over here. In Europe there are loads of men who do nothing except amuse themselves, and they can turn night into day, and life can be very merry.

"But over here, the men that are willing to dance all night, are the ones who aren't good for much else. Usually they are the ones who haven't much themselves, and are looking out for a rich wife, and are playing the society racket for that purpose.

"You know," she confided, "that

SMASHED WORLD'S RECORDS

New world's records for travel on water for all distances over thirty miles and under 750 miles were set by Rainbow VII. recently in a run on the Muskoka Lakes in Ontario. Rainbow VII, which is owned by H. B. Greening of Hamilton, covered a distance of 723.9 miles in 720 minutes. Her average speed for the elapsed time was 60.325 miles per hour. Figuring on her actual running time her average speed was 63.91 miles per hour. The run was made on a nineteen-mile course and the fastest lap was made at a speed of 65.9 miles per hour. Rainbow VII is driven by two 350 h.p. motors. In the above picture Rainbow VII is shown alongside the wharf retelling during the course of her record run.

pretty nearly any good looking man, who wears evening clothes well, is a good dancer, and knows his way around—can crash into the best sets

in New York. That's common knowledge.

"They haven't much to lose, and lots to gain by dancing attendance on

girls whose fathers did not lose all in the recent crashes in Wall Street.

NOT FOR MATRIMONY

"But they aren't just the sort you

want to pick your husband from—not because they haven't money—but because they haven't ambition and because when it comes right down to brass tacks, you really want more than a good looking dancing partner for a husband.

"As it is now, we girls with our late hours and our extravagant tastes are really driving away the type of men we really want to attract—men who are making a nation of readers, because some of the best men I know, have stopped dancing and taken up reading in a big way—

"Perhaps the earlier hours will bring them back."

Anyhow, it's worth trying.

Winter Drive Brings Early Tourist List

Bureau Wages Active Campaign to Establish All-year Season

California and Eastern Canada Embraced in Wide Publicity Range

Inquiries from advertisements in prairie newspapers and in many visitors already arriving, fruits of Victoria's drive for a record winter season are already being reaped according to reports received from the Victoria and Island Publicity Bureau.

Railway companies are joining hands with the Bureau which is conducting the most aggressive winter campaign in its history, appealing not only to prairie people but people of Eastern Canada, and even seizing the opportunities of advertising for winter visitors from California.

Pickwick Papers, travel magazine, published in Los Angeles and extensively circulated throughout Canada and the United States, contains the tenth successive article on Vancouver Island from the pen of Frank Glolma, published within a year. Many inquiries have been received from California in response to the appeal to visitors from the Golden State to visit Victoria and enjoy the invigorating snap of winter without the rigors of a hard eastern winter. The advantages of a complete change in climate for a part of the year has been emphasized.

"DECEMBER MORN" Twenty prairie newspapers have been forwarded an attractive picture of Vancouver Island under the caption, "A December Morn on Vancouver Island." It shows A. M. Wyde, landing a salmon from Cowichan Bay. The "West Coast Farmer" in response to a request will be supplied an article from the Publicity Bureau featuring the Experimental Farm, gardens, poultry raising, seed growing, dairy farming, and all forms of agriculture. Similar articles are being supplied to eastern and prairie papers with all the attractions of Victoria featured in a series of articles which refer to golf, automobile drives, riding, parks, scenery, seascapes, the Crystal Garden, theatres, and many other attractions here.

SAANICH CALLS SCHOOL BIDS

Tenders on Four Frame Buildings Invited By Trustees

Tenders for construction of new four-roomed frame schools in Wards Two and Six, and frame additions of two rooms each to Tillicum and Cloverdale schools, will be called at the end of this week by Hubert Savage, A.R.I.B.A., architect to the Saanich School Board. At a special meeting held last night at the Municipal Hall Mr. Savage presented completed specifications of the addition to Tillicum School and promised completion of the other three sets by the end of this week.

Shawnigan Lake

The eighteenth annual masquerade dance held under the auspices of the S.L.A.A. was held on Saturday evening and was an unqualified success. Upward of 100 attended from all parts of the district. The majority came masked and the many beautiful costumes made it a very colorful affair. The competition for the three special prizes was very keen. The judges had a difficult job in allotting the winners. The prize for the best dressed lady was awarded to Mrs. T. Owenap who represented a Spanish Lady. Mr. Stevens as a French drum major took the prize for the best dressed gentleman. The most humorous went to Mr. Fred Lester as "Colored Cook." The most original was won by Mr. P. Aske who represented The Game of Dice, creating lots of merriment with his playing the game with a colored gentleman oblivious of the dancers. As the evening wore on confetti and streamers added to the merriment. Art Minnis's Victoria orchestra played delightful music. A delicious supper was served and a most delightful time was had by all who attended. The affair was staged by the directors of the hall to augment the funds for hall upkeep.

Mrs. M. A. Curwin has started a class for instruction in folk dancing. The class opened on Monday evening in the S.L.A.A. Hall. The first attendance was quite gratifying. The class will be continued each Monday evening at 8 o'clock. Folk dancing is becoming the vogue and Shawnigan young people are keeping up-to-date.

Miss Lonsdale and the Shawnigan Choral Society, assisted by a concert party from Victoria, are holding a concert and dance in the S.L.A.A. Hall on Friday evening. The object is to wipe off the debt of the three public schools in the district last year. The concert will be first class in every particular and should draw a big crowd at the hall.

L. J. Whitaker has disposed of his general store business to Messrs McLaren Senior and Junior, late of Satchewan. The transfer occurred last week. The business will be carried on under the title of the McLaren Company.

NEW SALES MANAGER

DAVID F. AITCHISON

newly-appointed sales manager of the National Motor Company Limited. Mr. Aitchison before coming to Victoria was connected with the western sales division of the Ford Motor Company of Canada at Vancouver.

KEPT HIS PROMISE

Ella: Your suit looks rusty. Bert: Well, the tailor said it would wear like iron.

KEEP TRAFFIC MOVING

Pompeii never had traffic problems. In the human system, as in modern cities, the great need is to keep the traffic moving. A slight obstruction may cause very serious consequences. The road to health in the human body—the intestine—is 32 feet long. Think how easy it is for this long tube to become clogged. Think how essential it is to keep it healthy and active. You cannot afford by saying "I cannot go because I have a sick headache." You cannot plead indigestion or biliousness or constipation. It simply isn't done. You cannot confess that you are a victim of self poisoning from half digested food lying in the intestines, decaying and generating poisons which bedevil the eye, blotch the skin and stupefy the brain. Don't put off or delay. Try what a little friendly aid will do. CARTER'S LITTLE LIVER PILLS. Red Packages all druggists 25 cents.

(Adv.)

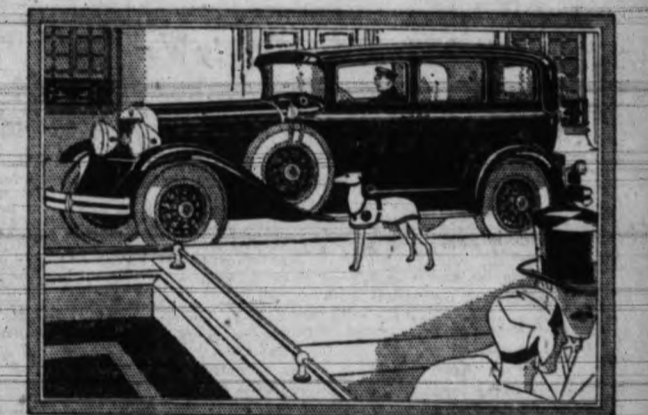

Kipling Plans To Travel For Health

London, Nov. 20.—Rudyard Kipling has been ordered abroad for his health by his physicians. The author, who will be sixty-four years of age next month, has canceled a radio speech scheduled for December 12.

The eyes of such birds as eagles, vultures and buzzards have a telescopic arrangement. Those of smaller birds have microscopic powers.

YOUR BABY and MINE

By MYRTLE MEYER ELDER

Mrs. Elder will be glad to answer all questions pertaining to babies and children. A stamped and self-addressed envelope forwarded to this office will bring a personal reply.

DOES YOUR CHILD GET AWAY WITH MURDER IN COMPANY?

We are all familiar with the complaint. "The children are so good at home but when I take them away they act like little demons." The child learns very early in life that his mother acts differently when strangers are around. In popular lingo, he can get away with murder. We can't wonder that under the circumstances he seizes the opportunity by the neck and holds on to it.

TO WHAT TYPE DOES YOUR CHILD BELONG?

We all know the sly youngster who won't speak, who refuses to say "Thank you," who hides his head in his mother's lap or sleeps at a friendly hand. We recognize, too, the little held-down-at-home child who capers about, tears open all the closet doors, opens drawers, pulls things from the table and rushes madly from one attraction to another. He makes the most of this opportunity in the home of strangers to do what he is pleased and stepped for doing at home.

The little show-off is another familiar type. He talks all the time, refusing to let the adults get in a word. When he misbehaves he enjoys the forced smiles and laughter he arouses from indulgent adults who don't live with him, or from strangers who can't express their true feelings but merely say, "Oh, isn't he energetic!"

THE ONLY CHILD

And then there are the children who get undivided attention at home. The only child! Naturally when this king of the realm is in company and has to share his attention with others, he resents it. He cries, behaves in any way so that his mother and father, in fact the whole company,

will look at him. The show-off belongs in the same class. He is used to adulation, and he has to have it.

Children have to get their practice in playing alone and without constant adult attention when they are at home. Otherwise, they will make their parents miserable on those occasions when it is impossible to give them undivided attention. Ignoring the child when he attempts to show off will do him a world of good, both at home and abroad.

PROVIDE HARMLESS OUTLETS FOR ENERGY

The child with no freedom at home never misses an opportunity to cut loose in the home of a stranger, where the mother is handicapped. The child who has unlimited activity at home and has been allowed to learn by handling and investigation to his heart's content may be curious about the treasures in a strange house. Such a child, however, will have learned that some things can be handled and some things left alone. He can't learn that on that infrequent occasions when he is taken visiting.

Don't expect that an active child between the walking and school ages is ever going to sit quietly and act like company. If the mother is wise, she'll take into account his ceaseless desire for activity, and provide him with enough harmless outlets for his energy so that he doesn't have to be constantly stopped and scolded every time he makes a move.

Tunic Style

A crepe Elizabethan frock in aquamarine blue has a long tunic, ending in a pleated ruffle. The tunic is tucked vertically at the waistline to give it a somewhat form-fitting effect.

BIG AUDIENCE HEARS CHOIR

First United Singers Appear For Royal St. George Society

In all local choral bodies of mixed voices for years past, perhaps no greater in honor recognition, worth and triumph stands forth than does the First United Church choir. It is a choir of distinction and can boast of unusual vocal resources, and it has, too, a long succession of individual talent, many of its members having gained distinction for themselves, and adding to the lustrous history of the choir.

Last evening, therefore, in the appearance of the choir in concert at the Amphion Hall, under the auspices of the Royal Society of St. George, there was a very large audience present. H. Langley acted as chairman.

The first number, "Awake Acolan Lyre" (Danby), at once brought the singers and listeners together, the latter evidently enjoying its spirited rendering. The second chorus, "Negro Dirge" (arranged by Robertson), was a beautiful bit of ensemble work, and "King Arthur" was also splendidly accomplished, both numbers showing the rare and dramatic instinct of the singers, and the able direction of their conductor, W. C. Pye.

The greatest interest, however, was centered in the numbers in which the choir was victorious at the recent Seattle choral competition, in all of which the choir left nothing to be desired. Clear cut, evenness, most satisfactory diction, delightful tonal qualities and "shading," all giving their hearers thorough enjoyment. The numbers were Henry Purcell's beautiful madrigal "Nymphs and Shepherds," Mackenzie's "Distant Bell" and "The Nightingale," by Weaks, the latter two being for ladies chorus.

FINE SOLOS

Excellent variety was found in the solo by J. H. Thomas, well-known to local concert platforms, and the solo by Marjory Watson in "Nursery Rhymes," this charming soprano again being heard with Beth Simpson in the duet, "Ma Curly-headed Baby." The trio, "Maiden Fair" (Haydn), by Messrs. Thomas, Jones and Veale, the quartette "Regular Royal Queen" (Gilbert and Sullivan), by Beth Simpson and Marjory Watson, F. J. Mitchell and W. C. Pye, and a solo by F. J. Mitchell, were further vocal contributions.

Mrs. W. B. Crowther caused much merriment in her clever humorous readings, "The Obstructed Hat in the Pit" and "My Lost Glove." A very well-rendered mandoline duet by Dorothea and Gladys Lea was also much enjoyed. Many encores asked for and received. The hall was specially decorated by ladies of the Royal Society of St. George, in shades of red, white and blue.

Perfect Coffee Recipe Cost \$30,000, Book Reveals; From Stone Age to Chinese Art

"Industrial Explorers" by Maurice Holland and H. F. Pringle Is One of Latest Volumes at Library; Mysteries of Chinese Art Subject of John Calvin Ferguson; Bonnie Prince Charlie a Fascinating Figure.

"Industrial explorers are the research workers on the frontiers of industry," says Maurice Holland, co-author with H. F. Pringle of "Industrial Explorers." This book tells the stories of nineteen leaders in the field of scientific research, or, as it is aptly named, "accelerated experience." These are the men reaching out towards new industrial frontiers. They labor in academic calm with microscopes and delicate apparatus, but their work affects profoundly the daily lives of their fellow men. The group includes the originator of the Sperry light, the discoverer of bakelite, and the inventor of Pyrex. There is also given the recipe for a perfect cup of coffee, scientifically discovered at a cost of \$30,000. The brief and often dramatic accounts of the explorers and their work are given in non-technical language. Many interesting parallels and contradictions are revealed. One uses cold as a preservative, another destroys canneries with heat; one seeks to eliminate acids, another finds in acids the solution to his particular problem. The men themselves reveal certain traits in common, the acquisition of knowledge seems to stimulate all of them beyond anything else. This is a fascinating book, shedding new light on the romance of industry.

OUR ANCESTORS

The events in man's prehistory which have been of greatest significance in his progress toward civilization are described in "Our Prehistoric Ancestors," by H. F. Cleland, Professor of Geology at Williams College. The early history of man is traced through the Stone Age to the Age of Bronze, when man learned to smelt copper and tin, and when warfare and trade grew in importance, and into the Age of Iron, which begins our modern civilization. The discussion is confined largely to

Europe. The neolithic or New Stone Age is stressed, because in it man made the greatest fundamental inventions, "compared with which the great achievements of to-day, though more spectacular, are relatively unimportant." This book will prove invaluable to students, being written clearly and concretely and particularly well illustrated with numerous drawings.

THE BONNIE PRINCE

There have been many biographies of "Bonnie Prince Charlie," and here is one after the modern manner, wherein the worst is told with the best. And it all sounds incredible, says the author, Donald Chidsey, it is backed by impressively full books, representing the labors of many patient men. The latter life of Charles Edward is given in much detail, because he did so much more than fight in 1746, "he fought all his life, and against soul-crushing odds, too. For these latter details, Mr. Chidsey pays his indebtedness to the great mass of personal and diplomatic correspondence edited within the last fifty years. He gives an honest, if not a complete, picture of the "drunken, ugly, old waster of Florence, who, when you get to know him, is as fascinating a figure as the handsome young athlete who secured three kingdoms out of their official wits." In victory there is glory, but in defeat there is poetry, and of this prince it may be said, "Defeat was his forte." This book is interesting as being the author's first published book; it is an honest, informal biography, avoiding the sensational, and written with liveliness and charm.

A small volume of delightful essays is "The Happy Potterer," by Mabel Doane. Here one is taken out of the world into the Kingdom of Fife, the home of the author. One meets Blair and Barney, "the grand wee hares," and Nancy, the Brown spaniel, "with a wise and tender little face, framed in enormous curly ears—so like Elizabeth Barrett Browning." The essays are charmingly and delicately written, and range in subject from gathering mushrooms to rummaging in an old attic.

STORIES REVIVE

"Shooting With Surtees," edited and compiled by Hugh Gladstone, is a collection of extracts from the works of Robert Smith Surtees, the creator of Jorrocks. These extracts are devoted to the shooting exploits of John Jorrocks, Joggiebury Crowder, Facey Rompney, Spongy and other famous sportsmen. Although nearly a century since their publication, the editor justifies bringing the works of Surtees to notice, since "he maintains it will do us good to laugh again—at the good old time in that 'age of the all-worshipped horse.' A sketch of Surtees' life begins the volume, which is well illustrated, and at the end is given the way unique 'Who's Who' in place of an index. This gives not only the names of persons mentioned in the preceding pages, but occasionally the names of their dogs, and many other valuable pieces of information. Lord Scatterdash suffered frequently from 'delirious tremors,' we are told, and the Prince Consort is described as having done much 'to refine and elevate mankind, and included farming in his list of amusements.'

MYSTERY OF CHINESE ART

Chang Ch'ou, one of the ablest critics of Chinese writings and paintings more than three hundred years ago, so delighted in his work that he wrote he would like to be transformed into a bookworm. He promised he would not injure any of the manuscripts or paintings in which he lived, but would be contented with mere existence in their company. His wish was the measure of his appreciation of the things he studied. Through them he held communion with the spirits of the artists, since to the Chinese their paintings have the mystery of the soul-world. Is it any wonder then, asks John Calvin Ferguson, author of "Chinese Painting," that this art is a mystery to the Westerner unfamiliar with Chinese civilization? The fact that Mr. Ferguson lived thirty-five years in China, in close touch with critics and connoisseurs, and that he has made a study of concurrent history, philosophy and poetry, makes his point of view as near to that of the native-born student as is possible to a foreigner. He stresses that the Chinese have not gone to the outside world for inspiration or methods, but have found in their own national culture an unending source of artistic stimulus. Their tendency to imitate the work of the past has given a uniform development to their art, as has never characterized the work of any other nation. After discussing technique and the early painters, the volume takes up the dynasties in historical order, with a summary of characteristics at the end of each section. This is a very adequate presentation of Chinese art, given with authority and understanding. There are more than fifty very beautiful illustrations, some of pictures never before available. This valuable book is in the reference room of the library.

Too Considerate
Wife: I believe you often wish I had married another man.
Husband: Nonsense! I have no enemies.

He's Too Modern
The Girl Friend: How did your wife get to hear of me?
He: My dreams have turned to talkies.

WILL HOLD TWO DAY BAZAAR

The principal business of the November meeting of the Catholic Women's League, Victoria Subdivision, consisted in arrangements for the forthcoming two-day bazaar. Mrs. McKenna, the president, announced the bazaar will be opened in the Amphion Hall, Yates Street at 5 o'clock on Friday November 22, by Right Rev. Monsignor Letorne, V.G., continuing all day and evening and all of Saturday and Sunday evening, November 23. The Junior League will hold a "Friendship Social" this evening in the K. of C. Hall at 8 o'clock, when newcomers to Victoria will be particularly welcome, with games, cards and music.

Hospital visitors for the ensuing month were appointed, Mrs. Killoran and Mrs. Mahoney. Speaking for the Social Service, Miss Harriet O'Brien reported some excellent work being done for mothers' pensions, and the care of the sick. A special appeal was made for clothing. Mrs. McKenna, reporting for the League's share in the Drive for the Blind, in which she had been appointed captain, announced a very satisfactory sum, having been realized through the efforts of her lieutenants, Mrs. Selby, Mrs. Masarati, Mrs. W. G. J. Haswell, Mrs. Killoran, Mrs. Hutchinson, Mrs. Mulligan, Mrs. J. A. J. McKenna, Mrs. McKenna, Mrs. Robt. Canavan, Poppy Day was also arranged for by Mrs. McKenna as convener of tag days, and assistance given with the Rummage Sale for the Local Council of Women.

The December meeting will take the

Make Preliminary Plans For U. B. C. Sports Invasion

Weaklings Bare Their Fangs In N.H.L. Struggle

Chicago Black Hawks and Pittsburgh Pirates, Two of Last Year's Tail-enders, Show Their Strength by Victories Over Americans and Toronto, Respectively; Montreal Maroons Down Canadiens; Rangers Lose to Boston in Only Tight Scoring Game.

Toronto, Nov. 20.—A new game for hockey fans to find the weak team in the National Hockey League, is the vogue. This year's change in rules, with its great spurge of scoring has made every one of the ten clubs a potential champion and so far not one has been eliminated from the list of possibilities.

The weaklings of the 1928-29 season have been strengthened so that they bear only a faint semblance to last year's tail-enders, while the strong ones have shown few signs of slipping, so far in the campaign. Only the New York Americans have shown any weakness and they have good reason for not being up to the standard owing to trouble with "hold-outs."

They had but four spares on the bench last night when they took their second defeat of the year from the Chicago Black Hawks by a 3-1 score and the first step to increase the American man power has yet to be taken.

HAWKS' FAST
Chicago, a hopeless cellar occupant a year ago, has developed a fast young team that is right up among the leaders. The Hawks have two ties and a victory to their record so far. Their speed and fight completely overwhelmed the Americans last night.

Pittsburgh, another trailer last year, has given evidence of strength by beating the strong Toronto Maple Leafs in one of the wildest scoring affairs the league has seen. The Pirates

handed Toronto a two-goal lead, then came out to come out on the long end of a 10-5 score.

Montreal Maroons showed that they have to be reckoned with this year by downing Canadiens 5 to 1 in a rough encounter, while Ottawa Senators turned in their second victory in three games by defeating Detroit Cougars 6-4.

It remained for the two strongest teams of last spring's line-up to turn in the lowest score of last night's five games. The victory left the Bruins alone at the top of the standing, the only team which has won all of its first three games.

Pittsburgh, Nov. 20.—Led by the sturdy Johnny McKinnon, the Pittsburgh Pirates went on a scoring rampage in last night's National Hockey League fixture against the Toronto Maple Leafs and piled up a 10-5 score against their opponents. McKinnon led the sensational Pirate offense with four goals to his credit.

LINE-UPS
Pittsburgh: McKinnon, 4-25; McKinnon, Fredrickson, Milks and Daragh.
Toronto: Chabot, Horner, Day, Blair, Cox and Bailey.

SUBS—Pittsburgh: McCaffery, Briden, Lowery, Drury, Jarvis, Barton and White. Toronto: Grant, Smith, Primm, Pettigrew, Conacher, Brydson and Cotto.

Officials—Bill O'Hara and Cy Denahy.

SUMMARY
First period—1, Toronto, Day, 5; 2, Toronto, Blair from Day, 23; 3, Pittsburgh, McKinnon from Fredrickson, 10-5.

Second period—4, Toronto, Day from Bailey and Blair, 2-24; 5, Pittsburgh, McKinnon, 3-01; 6, Pittsburgh, Daragh from Briden and Fredrickson, 45; 7, Pittsburgh, McKinnon, 31; 8, Pittsburgh, Fredrickson from Daragh, 1-39; 9, Pittsburgh, McKinnon, 4-25; 10, Pittsburgh, Milks from Fredrickson and Daragh, 3-55.

Third period—11, Pittsburgh, Milks, 45; 12, Pittsburgh, Fredrickson from McCaffery, 3-47; 13, Pittsburgh, Milks from Fredrickson, 3-00; 4, Toronto, Day from Bailey, 2-30; 15, Toronto, Day from Bailey, 55.

Montreal, Nov. 20.—Montreal Maroons showed real championship form last night when they defeated their arch rivalry rivals, Canadiens, 5 to 1. The heavy Maroon team outskated, outshot and outmaneuvered their lighter opponents at all stages of the contest. It was the first time since the season of 1927-28 that the Maroons have defeated the red shirts.

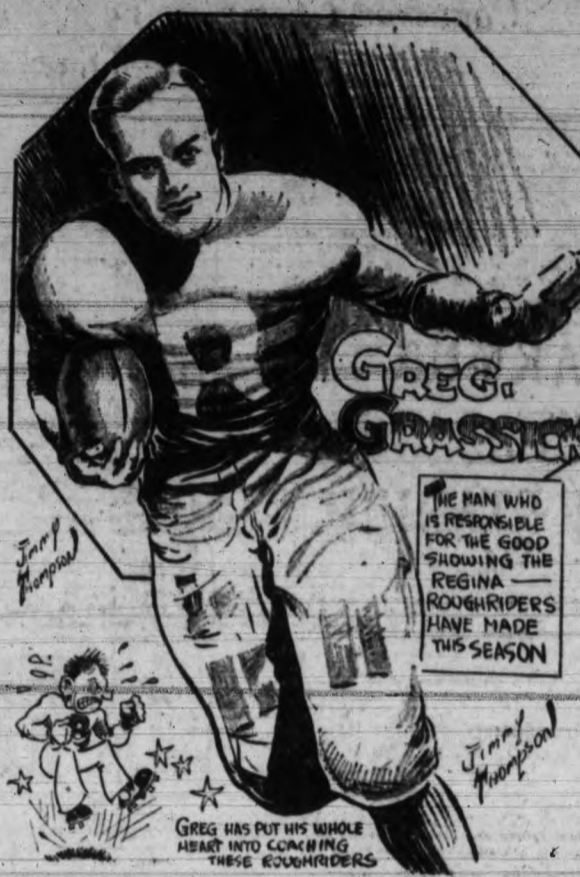

THE LINE-UPS
Canadiens—Hainsworth, S. Mantha, Burke, Lepine, Wasmie and Joliat.
Maroons—Benedict, Boucher, Smith, Phillips, Ward and Trotter.

SUBS—Canadiens: Leduc, Fraser, Mondak, Lacroix, G. Mantha, Robinson, Dutton, Stewart, Siebert, Robinson, Wilcock and Norcott.

Officials—Cooper Smeaton and Jean Sauve.

SUMMARY
First period—1, Maroons, H. Smith, 18-14.
Second period—2, Maroons, Boucher,

Regina's Star Coach—By Jimmy Thompson

A motion declaring the Rough Riders of Regina, western Canada football champions without the necessity of meeting the British Columbia winners, was passed at the annual meeting of the Western Canada Football Union at Regina recently. This action was based on the rule which requires that the final be played not later than Thanksgiving Day. Greg Grassick, backfield star and coach of the Rough Riders is the man responsible for the feat of Regina in again winning the Western Canada senior football championship. Grassick is a former McGill, Montreal, player, and he took over the coaching duties this fall when the Reginas found themselves without a mentor. Grassick has starred on the backfield for the Riders for many years, played in but one game this season, receiving his time as manager of the squad. Des Grubb has been one of the mainstays of the half-line during the schedule, and his tricky broken-field running and team-work with Eddie James stamps him as one of the best backfield men in the west.

4-05; 3, Maroons, Phillips from Trotter, 5-55.
Third period—4, Maroons, Phillips from Trotter, 9-31; 5, Canadiens, Joliat, 5-20; 6, Maroons, Siebert, 4-43.

DETROIT, Nov. 20.—Ottawa's fighting Senators defeated the Detroit Cougars here last night, turning loose a battery of offense that netted them six goals, and showing a sensational goal-tending exhibition by Alex Connell that held the Cougars to four goals. The Senators had far better work than the Cougars and their passing attack clicked on every occasion.

THE LINE-UPS
Detroit—Dolson, Nobis, Rockburn, Cunniff, Cooper and Bellefleur.
Ottawa—Connell, Clancy, P. Smith, Lamb, Finnegan and H. Kilrea.
Subs—Ottawa: Nighbor, Touhey, Starr, Shields, Grosvenor, W. Kilrea, Detroit: Goddell, Lewis, Aurie, Hay, Herbert, Hicks and Hughes.

Officials—Heffernan and Corbett.
SUMMARY
First period—1, Ottawa, Touhey, 18-45.
Second period—2, Detroit, Lewis, 9-44; 3, Detroit, Bellefleur from Hay, 2-44; 4, Ottawa, H. Kilrea from Lamb, 1-22; 5, Ottawa, Clancy, 30; 6, Ottawa, Clancy from Finnegan, 4-39.

Third period—7, Ottawa, Lamb, 2-33; 8, Ottawa, H. Kilrea, 9-04; 9, Detroit, Lewis from Connors, 13-47; 10, Detroit, Lewis from Lewis, 18-14.

NEW YORK, Nov. 20.—The young Chicago Black Hawks, which bore little resemblance to last year's tailenders of the National Hockey League, defeated the New York Americans 5 to 1 in their home opening last night.

Led by a pair of recruits, Art Somers, former Winnipeg and Coast star, and Tommy Cook, the Hawks took the lead shortly after the opening.

THE LINE-UPS
New York—Worster, Reise, Chnacher, Himes, McVeigh and Shepherd.
Chicago—Gardner, Taylor, Westworth, Cook, Couture and Miller.

SUBS—New York: Simpson, Holmes, Massiac, Chicago: Gottselig, Dutkowski, Somers, Abel, Ripley, Marsh and Arbour.
SUMMARY
First period—1, Chicago, Marsh from Cook, 12-05; 2, Chicago, Couture from Cook, 3-03.

Second period—3, Chicago, Somers from Ripley, 13-26; 4, Chicago, Somers from Abel, 3-24.

Third—5, Chicago, Arbour from Somers, 14-19; 6, Americana, Massiac from Simpson, 3-17.

Boston, Nov. 20.—The Boston Bruins, playing in mid-season form, opened their home season here last night by coming from behind and noosing out the Rangers 3-2. The victory enabled the world's champions to keep their current slate clean and gave them a firmer grip on the top position in the American division of the National Hockey League.

THE LINE-UPS
Boston—Thomson, Shore, Hitchman, Carson, Gange and Galbraith.
Rangers—Boucher, Bourgauf, Johnson, Boucher, W. Cook and P. Cook.

SUBS—Boston: Gainer, Welland, Barry, McKay, Clapper, Taylor, Fanger, Keeling, Foster, Queensville, Murdoch, Vail and Goldworthy.
Officials—Mallison and McKenzie.
SUMMARY
First period—1, New York, Boucher from W. Cook, 3-50; 2, Boston, Gainer, 4-30.

Second period—3, New York, F. Cook from W. Cook, 18-30.
Third period—4, Boston, Gainer, 2-30; 5, Boston, Clapper, 13-16.

Amateur Hockey To Be Controlled By Amateur Union

St. Louis, Nov. 20.—The Amateur Athletic Union yesterday took steps designed to give the organization control over amateur hockey. It probably will be accomplished within the coming year and give the A.A.U. jurisdiction over the sport in preparation for the 1932 Olympics. Formerly this control has been exercised by the United States Amateur Hockey Association.

Thousand Bridge Players to Seek Championships

Chicago, Nov. 20.—One thousand bridge players from nearly every state as well as Canada, Mexico and Hawaii, are scheduled to begin play today in the United States championship tournament of the American Bridge League. The women's team will be defeated by the Pittsburgh team, which is led by Stahl, Miss Margaret Beech, Mrs. H. E. Parsons and Mrs. C. W. Nokes. Mrs. Stahl and Miss Beech will also defend their women's championship. Baron von Zeltwita and Theodore Litzner of New York, United States contract pair champions, will also compete.

"BILLY" TOWNSEND SPRAINS ANKLE

Nanaimo Boxer Hurt When Car Overturned; Companion Required Medical Attention

Nanaimo, Nov. 20.—"Billy" Townsend, Nanaimo's native son and lightweight boxer, while driving to Vancouver on Saturday last with a friend had the misfortune to have his car overturned. Billy received a sprained ankle and was noticed at the dock, where he was boarding the boat for Vancouver, to be limping quite badly. He is not expected to be fit for ring work for a month. His companion received a cut on the side of the neck which required three stitches.

Judge Landis To Make Ruling On Barnstorm Trips

New York, Nov. 20.—Commissioner Landis may have something to say about barnstorming ball players who fail to keep their dates when he addresses the indoor league managers at their meeting in Chattanooga next month.

The commissioner held last week that he had received no formal complaints, but it is believed that he was aroused by the failure of Art Shires and his team to show up for a scheduled game at Toledo.

A crowd was on hand waiting for the game, but the "attraction" never appeared.

Mike Dundee Wins By Knockout Route

Chicago, Nov. 20.—Mike Dundee, of Rock Island, knocked out Chick Suggs, New Bedford, Mass., negro featherweight, in the second round of a ten-round main bout here last night.

Close Basketball Game Anticipated

(Special to The Times)
Duncan, Nov. 20.—Duncan basketball fans are looking forward to Thursday's game when Nanaimo will travel to Duncan to meet the senior "B" team.

Both these teams have wonderful records, not having lost a game this season, and last year fought for the Island senior "B" championship, when Nanaimo won by one point.

Nanaimo girls' team met Duncan in the first stage of the game. McDonald, J. Drom, Talbot, A. Drom, Fletcher, McMillan, McNeil and McEwen. Girls, Castley, I. Stock, G. Stock, Fletcher, Thoubourne, Weeks and McDonald.

Cleveland, Ohio, Nov. 20.—Tom Freeman, Erie, Pa., welterweight, won from Farmer Joe Cooper, Terre Haute, Ind., on a technical knockout in the first round of their scheduled ten-round bout here last night.

Strangler Lewis Throws Stetcher

Kansas City, Nov. 20.—Ed (Strangler) Lewis, former heavyweight wrestling champion, defeated Joe Stetcher, former title holder, by winning the last two falls in a three-fall match here last night.

Badminton Grips Canada As Popular Court Game

BY JACK PURCELL
Canadian Badminton Singles Champion

Sweeping across Canada on a wave of widespread popularity which has carried it to the top rank among pastimes enjoyed by Canadians, the game of badminton has, during the last few years, experienced a measure of growth amazing to say the least. Clear across the Dominion from Halifax to Victoria new clubs are being organized each season and the fine clubhouses which are being erected are evidences of the immense popularity which the game has attained.

In addition to the clubs organized expressly for badminton, practically every athletic club boasts of at least one badminton court, while church halls are being pressed into service, and many large halls which have been unoccupied for some time are now being remodeled and made suitable for badminton courts.

Armories, of course, are still the headquarters for the various garrison badminton clubs, whose enthusiasm for the game in its early stages is perhaps more responsible than anything else for the high place to which it has risen in the last short while. Previous to 1925, when the first private clubs in Canada were formed, the various armories housed practically all the badminton courts then available. With the formation of these private organizations interest in the game increased greatly, and towards the end of the 1925 season an event occurred which was to start the game on its meteoric rise to its present popularity.

(Watch for Mr. Purcell's next article of this series on badminton, appearing exclusively in The Times. Mr. Purcell, reached in care of this newspaper, will be glad to answer any correspondence relating to badminton.)

Students to Pay Annual Visit to City In January

Victoria College Students' Council Instructs Secretary to Write Vancouver for Data on Athletic Meet Here January 3 and 4; Varsity Expected to Send Over Four Basketball Teams, Two Rugby Squads, Swimming Party and Possibly Grass Hockey and Soccer Teams; McKechnie Cup Rugby Game Set for January 4.

Negotiations for the annual sports invasion of the University of British Columbia athletes on January 3 and 4 were opened at Victoria College yesterday, when the students' council of the institution instructed its secretary to write Varsity for preliminary data on the meet. As usual two rugby teams, senior and intermediate; a contingent of swimmers, men's and women's senior basketball quintettes, a women's grass hockey team and perhaps a soccer eleven are expected to come from U.B.C.

College will oppose the visitors in an intermediate rugby game, men's and women's intermediate basketball, and most probably soccer and women's grass hockey.

Ice Hockey, which was introduced into the invasion programme last year, will be dropped this season.

Prospects look bright for the College in the games in which they meet University of British Columbia. Their intermediate rugby team appears to be the strongest in the local league and compares very favorably with that which sent Varsity down to defeat last year.

In basketball the boys' squad has been going along smoothly so far this year. It will no doubt be strengthened by the addition of Bill White and "Chuck" Chapman, who are playing in senior company here.

In the senior division, Varsity looks fairly secure. The men's squad includes several of the victors of the first half of last year. Wally Meyers, Arnold Henderson and a couple of fast new recruits will form the backbone of the quintette and should be strong enough for any local competition.

Reilly Tingley will lead the women's senior "A" team, which is reported to be working well this year.

EXPECT STRONG SWIMMERS
U.B.C. swimming team should stand a better chance against Victoria than it has ever done before. Ron Wilson, sprint and middle distance star for Varsity, will captain the squad. Wilson is good at freestyle and backstroke and placed well in the B.C. championships met here early this month.

The girls' section of the team should also be strong. Margaret Ross, former Victoria breast stroke swimmer, will carry the Varsity colors during the meet, and will be backed up by several good freestyle competitors.

Ernie Feden, who has been showing good form on mainland spring boards, will represent the invaders in the men's diving.

It is understood that the Y.M.C.A. will send a team against the visiting swimmers. The local association has a squad of fast juniors and one or two good drivers, who should put up good competition. The loss of Owen Bailey

Y.M.C.A. will send a team against the visiting swimmers. The local association has a squad of fast juniors and one or two good drivers, who should put up good competition. The loss of Owen Bailey

German Wrestler Winner Over Hagen

New York, Nov. 20.—Richard Shikat, German wrestler, made his second successful defence of the world's heavyweight title, awarded him by the New York and Pennsylvania Athletic Commissions, against attacks of George Hagen of New York, last night. Shikat pinned Hagen to the mat after one hour and fifteen seconds of wrestling in their finish match. They met two weeks ago with the same result.

Kid Chocolate Wins Decision

New York, Nov. 20.—Kid Chocolate, clever Cuban featherweight, won the decision over Jose Martinez of Spain, in their ten-round bout at Brooklyn last night.

Births, Marriages, Deaths

DEATH
DAVIDSON—The death occurred at the Jubilee Hospital, on Nov. 19, of Jean Ann Davidson, beloved wife of George Edgar Davidson, eldest daughter of the late Mr. and Mrs. Robert Scott, and granddaughter of the late Robert Shippard, Erie Street, aged 68 years, and born in Victoria, B.C., her late residence being 3409 Richmond Road, Saanichton. She leaves to mourn her loss, besides her husband, one sister, Mrs. Mrs. C. H. Hawley, also of the above address.

The remains are resting at Haywards B.C. Funeral Chapel from where the funeral will take place on Thursday afternoon at 3.30. Rev. H. P. S. Luffell, assisted by Rev. David Lester of Kerrisdale, Vancouver, will officiate. The interment will be made in Ross Bay Cemetery.

GODFREY—At Saanichton, on Monday, Nov. 18, Louis Godfrey, aged 45 years, a pioneer settler of that district. He is mourned by his widow and two little daughters, also two brothers, Eddie of 819 Hillside Ave., and Adam of 1302 Hillside Ave., Victoria, and two sisters, Mrs. C. H. and Mrs. Seward of Vancouver, B.C.

The funeral will take place on Thursday afternoon from McCall Bros' Funeral Home at 2 o'clock. Rev. J. Smith Patterson will conduct the service, after which interment will be made at Royal Oak Burial Park.

TALKIES CLAIMING
BBC RADIO MEN

London, Nov. 20.—The British
 Broadcasting Company, which has
 been accused of having employed
 men to leave the company's
 employment to join the talkie
 movies.

Six of the BBC engineers recently
 resigned at the same time to take
 up engineering positions with a
 talkie company. During the last
 few weeks there have been numerous
 desertions from the staff, the
 majority of them going to the
 spoken movies.

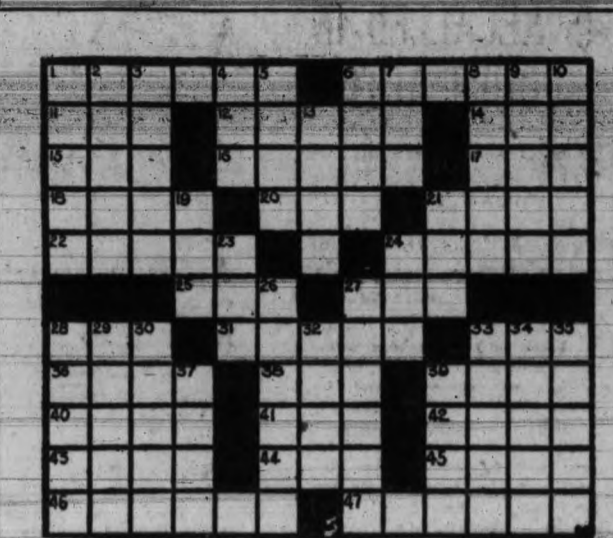

London, Nov. 20.—Miss Williams of
 Exmouth, Surrey, has one of the strangest
 jobs in the world. She carries a jam-
 pot of mosquitoes all over England and
 gets paid for it. In the pot are mos-
 quitoes which carry malaria. These are
 taken to sufferers of brain disease and
 are allowed to bite them. In many
 cases the bite of these insects cures the
 brain disease.

Neptune is thirty times as far from
 the sun as the earth, or nearly three
 billion miles. It takes this planet 165
 of our years to make one circuit
 around the sun. It is 30,000 miles
 in diameter.

The most densely populated state is
 Rhode Island, with an average of 566
 inhabitants per square mile.

Nevada is the least densely popu-
 lated state. It has only seven inhabi-
 tants per square mile. Alaska Terri-
 tory has only one.

Pilgrim Boy Grew Up in Strange
New Country
 Little Peregrine White held his
 mother's hand and looked with her
 across the water. They were watching
 a boat. He sailed spread wide in the
 sunlight, which was fast disappearing
 beyond the horizon.
 He looked up suddenly to find her
 eyes full of tears. "What is it,
 mother?" he asked anxiously, for he
 had never seen his mother cry.
 She smiled down at him and tried

to explain that she was homesick.
 They walked slowly away from the sea-
 shore, back to the log cabin in which
 they lived, while she told him that
 the boat was going to England, across
 the wide ocean, and that it would be
 a long time before another boat came
 to visit those New England shores. She
 told him about her girlhood in Eng-
 land, in a little village.
 Peregrine was puzzled. He thought
 his home was quite nice enough.
 Around them were the great forests,
 in which boys were never allowed to
 play, though they sometimes went
 hunting with their fathers. There were
 Indians, with feather headresses,
 who sometimes came to pay a friendly
 visit. He looked back over his shoulder
 at the disappearing ship and
 thought that grown-up people had very
 strange ideas, indeed.
 Peregrine White, born 300 years ago
 to-day, was the first white child born
 in New England.

NORANDA TO START DEVELOPMENT ON DEEP ORE BODIES

Montreal, Nov. 20. (Miller-Court.)—
 By the middle of the coming summer
 Noranda Mines will have work estab-
 lished to a depth of 1,500 feet. Shaft-
 stations, fittings and general prepara-
 tions will have been completed by
 that time to the point where develop-
 ment will be reaching out through the
 ore bodies at that horizon.

Having in mind the extent of the
 success achieved in the first 1,000 feet
 in depth, the importance of this
 deeper work is realized. For instance,
 should the capacity in similar volume
 to 1,500 feet as it has to 975 feet, this
 new work would open the way to an
 additional \$50,000,000.

Details presented recently dealt with
 the indicated \$10,000,000 in each 100
 feet in depth so far developed on
 Noranda. This having already been
 indicated, and with considerable room
 left for extension of lateral exploration,
 there are prospects of the resources
 ultimately exceeding such an average.

From present indications, the ore
 from 200 feet in depth would be suf-
 ficient to maintain the smelter at 2,000
 tons daily capacity, this being made up
 largely by higher grade ore direct
 from the mine, and the balance being
 in the form of concentrates from the
 concentrator.

In regard to the concentrator, this
 should perhaps not be considered in
 the light of an increase in tonnage
 when reckoned on the basis of average
 values in Noranda ore. The smelter
 capacity is the basis of the bottle-
 neck through which the capacity should
 be measured. What the concentrator
 really does is take care of lower grade
 ore, concentrating the metal from say
 three tons of crude to one ton of con-
 centrate. The concentrate will be
 higher in grade than the average of
 the high-grade going from the mine
 direct to the smelter. This should re-
 flect itself by a moderate increase in
 the average of 2,000 tons daily for
 which the smelter is designed. A factor
 to be taken care of is that the cost
 involved will be substantially greater
 where a ton of concentrate is con-
 cerned as compared with a ton of
 high-grade direct from the mine. For
 instance, mining costs of three tons
 will be applied to the cost of one ton
 of concentrate delivered to the smelter,
 while there will be also the added cost
 of concentration.

Within the next few weeks, Noranda
 will have all equipment in full opera-
 tion, and will start the work on a
 producing basis pretty close to a rate
 of \$20,000,000 a year. Such an achieve-
 ment is little short of sensational in
 the business of mining—such a new
 mine, in such a short time finding
 itself in the position of producing
 second only to International Nickel and
 Consolidated Smelters among the
 mines of Canada.

PRIZE BABY

Even lion cubs are contesting for
 baby shows now, and above is pic-
 tured the winner of the unique
 "Baby Show" held at the Los Angeles
 Spillville is only one month
 old and weighs three pounds, but
 he was the "most perfect" of nine
 baby lions that competed. Mrs.
 Roy Palmer, one of the judges,
 is holding him.

YOUR CHILDREN

By OLIVE ROBERTS BARTON
 (Copyright, 1929, by NEA Service, Inc.)

Children learn more quickly through
 interest than compulsion. That's one
 thing for us to keep in mind. What
 they heard in fresh air they remember
 ninety per cent of—that's another
 thing we should not lose sight of.

These two things I believe are going
 to shape the destinies as well as the
 structure of our future schools.

Just a word about this matter of
 fresh air. New school buildings even
 now are practically all glass. Splendid!
 That lets in sunlight, and better still,
 the windows are arranged to let in
 floods of fresh air without endangering
 the children; also new heating appar-
 atus furnishes fresh air moistened and
 tempered for small lungs to inhale.

But is it enough? In a line let me
 make a sweeping statement that those
 who may linger on this mortal soil
 fifty years hence may not think so
 strange. Classes will be held outdoors
 whenever the weather permits. Some
 day we'll have fresh-air or rather open-
 air schools.

IT'S DONE IN EUROPE

Indeed, in certain fresh-air camps in
 Europe where children with lung
 troubles are fighting for life, they do it
 now. The children study outdoors in
 the snow—sitting in fur-lined bags

and wearing fur hoods like little Es-
 kimos.

Now for that more elusive thing—
 interest.

Take ourselves, for instance. What
 do we do best? The thing we like and
 want to do, certainly. Oh, but we
 can't do it all the time, just doing the
 things we like! We like to paint, but
 we've got to make beds and wash
 dishes and cook, we like history, but
 we have had to study bookkeeping and
 shorthand, and so on. We like to read,
 but we've got to get up and go to school,
 but we'll not argue that perhaps the
 bread might have been just as thick
 with perhaps a little jam on top if
 the history or the painting had become
 the means of livelihood—not because
 history and painting bring bigger
 results than the routine and
 shorthand, but because through sheer
 interest there is no telling to what
 heights we may have gone.

How can we manage this business of
 training children to a higher degree of
 perfection through their interest?

It is simple. By making them im-
 terested in the things we want them to
 learn.

PRIZE FOR MOVIES

Again the incredulous catch me up
 and declare it can't be done. I argue
 that they don't know because we have
 never tried it. I am going back to my
 old hobby—the movies. The idea of
 school movies is gaining slowly, but I'd
 like to see it come along more quickly.
 Movies to supplement the text-book in
 teaching practically everything will
 stimulate interest.

I believe the day will come when we
 won't be able to keep children home
 from school. I don't suppose I'll live
 to see it, but I believe firmly that some
 day you will. We more dragging and
 coaxing and threatening—no more
 dreary and heart-sinking on the part of
 the children. That would be Utopia
 indeed.

GREAT WHEAT STORES
WILL FIND MARKET

(Continued From Page 1)

tain has confined its buying to other
 countries, leaving a huge quantity of
 wheat in this country, especially
 without a market. But the high grade
 of our wheat, recognized by the British
 buyers to be in a class by itself, will
 inevitably result in the purchase of
 our supplies at a time and at a price
 that will not react unfavorably against
 the farmers.

CO-OPERATION DISCUSSION

Ottawa, Nov. 20.—The Department
 of Trade and Commerce has received no
 official word of any move toward co-
 operation between the Federal Grain
 Corporation of the United States and
 the Canadian Wheat Pool. Rumors of
 such a step, however, have been
 current here for some time, ac-
 cording to E. C. O'Hara, Deputy
 Minister of Trade.

The statement of Alexander Legge,
 chairman of the Federal Farm Board
 of the United States, that the govern-
 ment has taken place between the two or-
 ganizations has been received here with
 considerable interest. The large hold-
 ings of wheat from last year in this
 country and the present plentiful sup-
 ply in the world markets have brought
 serious problems to the disposal of the
 grain in Canadian elevators.

While the nature of the co-operation
 can only be conjectured here, it is felt
 by those in close touch with the situ-
 ation that such a proposal would mean
 the concentration of the United States
 and Canadian markets.

E. B. Ramsey, chairman of the Grain
 Board of Canada, recently stated the
 ideal situation was one in which
 wheat would move overseas in a regu-
 lar flow instead of choking transportation
 facilities for a comparatively short
 period in the year.

Hope was expressed here that co-
 operation between farmers' organiza-
 tions on both sides of the border might
 bring about the desired effect.

MOSCOW REDS ARE AT
WORK IN SOUTH AFRICA

(Continued From Page 1)

and beaten by mobs of natives and
 life and property were seriously en-
 dangered. A mob of 500 natives, led
 from Maritzburg had been threatened.
 Altogether 12,000 natives in the com-
 pounds had refused to pay the poll tax
 and thousands of natives in the city of
 Durban, followed the example of Mr.
 Pieterse. Liquor brewing was exten-
 sively carried on in violation of the
 regulations. A police force rounding
 up defectors on October 24 was at-
 tacked by 3,000 natives. Luckily only
 seven of the policemen were injured.

THREAT MADE

The natives had formed a strong or-
 ganization for the mutual support of
 their case, Mr. Pieterse declared. The
 police had been informed not one man
 would escape alive when the next raid
 was made. The general strike of all
 dock-workers had been prepared and
 intended to be carried out on Thursday.

LIQUOR STORM GROWING IN WASHINGTON

(Continued From Page 1)

He made the Panama trip accom-
 panied by his nephew, Charles Lane of
 St. Louis, his secretary, Miss Lucille
 Lee, said.

VOICES DRY

Denison, who as a lawyer, has been a
 consistent dry voter during his eight
 terms as representative of the territory
 of Illinois District, which includes
 Williams County, where the Herrin
 riots occurred. He voted for the
 Eighteenth Amendment, the Volstead
 Act and the Jones law. The latter im-
 poses drastic penalties on liquor law
 violators.

VOICES SURPRISE

He was advised at his home in Mar-
 ion, Ill., of the grand jury's action. The
 situation was explained to him by Miss
 Lee in a telephone conversation and he
 belonged to someone else, he had not
 him if he desired to make a state-
 ment.

Expressing surprise an indictment
 had been returned, Denison said, "I
 am very much surprised. When the
 prohibition agents came to my office
 and inquired about a trunk, I per-
 mitted them to inspect it. I found the
 trunk was not mine; it belonged to
 someone else. I am very much sur-
 prised an indictment has been re-
 turned. A similar mistake had been
 made, he said, with regard to a hand-
 bag. His nephew, Lane, he added, had
 a bag, but a mistake had been made
 and the wrong one was sent to him.
 He indicated he thought the matter
 had been disposed of satisfactorily.

He said he expected to come to
 Washington soon.

NO KEY ON HAND

The prohibition agent's report said
 shipping tags on the bag and trunk
 were addressed to John Layne at Deni-
 son's office. When they first called at
 the office, they said, Denison told them
 he did not have a key to the trunk,
 but when they called again, they said,
 he had decided the trunk was not his
 and gave his permission for them to
 open it. It was found, they re-
 ported, to contain whisky and gin.

John Layne, who is in the general
 counsel's office at the Interior Depart-
 ment, said to-day he had never been
 there and that he had not been out
 of Washington during January. He
 was emphatic in declaring he was
 not connected in any way with the
 case and that the indictment was "the
 result of mistaken identity."

PLANE PILOT MISSING
NEAR SHIPS IN ICE

(Continued From Page 1)

BACK TO NOME

The fliers are attempting to bring
 those aboard the ship back to NOME
 and the Soviet ship Stavropol, icebound
 near the Nanuk, to NOME.

They are also endeavoring to bring
 a quantity of valuable furs from the
 Nanuk, a trading ship owned by the
 Swenson Fur Company. They made
 one trip to the Nanuk and returned
 here with six passengers and a quan-
 tity of furs.

NET STORM

On their attempted return to the
 Nanuk they were forced down a glacier,
 Alaska. They took off from the ice
 on November 9, but Dorbandt turned
 back after about an hour because of stormy
 weather, while Eliason continued his
 flight. With the exception of the time
 he was sighted by natives and his
 motor was heard, no other news of him
 has been heard from since. He was
 well supplied with food, carried a
 sleeping bag and a small stove and
 was well versed with Arctic conditions,
 which led Dorbandt to believe he would
 be in little danger for a considerable
 time.

MAKES REPAIRS

Dorbandt attempted to take off last
 Sunday from Keller for NOME, but
 to search for Eliason, but broke an
 axle on his plane. He intended to hop
 off again as soon as he could make re-
 pairs. Severe storms have been raging
 in the northland for more than a week,
 hampering attempts at rescue. Means
 of communication are so limited it has
 been impossible to obtain the complete
 details of the missing aviator.

Passengers aboard the Nanuk include
 Olaf Swenson, head of the company
 which owns the ship, and his daughter
 who came from Chicago to see the
 Marion. Among those aboard the
 ship are five members of a
 scientific expedition. It was estimated
 it would require six trips to bring the
 passengers and furs to the mainland.

**6,000 RUSSIAN MEN-
 NONITES SEEK NEW
 CANADIAN HOMES**

(Continued From Page 1)

ments of Mennonites in the prairie
 provinces, good farmers and prosper-
 ous, had indicated they would be pre-
 pared to supply their fellow country-
 men from Russia with food and other
 necessities of life.

As far as Manitoba was con-
 cerned, Mr. Hoey declared, not
 more than a thousand Mennonites
 would be allowed to come into
 the province under any circum-
 stances.

"We did not talk of exceeding that
 number," he commented.

Manitoba's decision regarding the
 proposal will rest over until the re-
 turn to the city of Premier Bracken,
 who is expected back from Great
 Britain in a few days. The Govern-
 ment here will make no announce-
 ment until Saskatchewan and Alberta
 Governments have had time to con-
 sider the question.

NO LOSS OF TIME

Premier J. T. M. Anderson of Sas-
 katchewan, to whose Government first
 advances were made to receive Men-
 nonites, probably would be presented
 with the new proposal immediately, Mr.
 Hoey thought. Premier Brownlee of
 Alberta also would be interviewed.

The Saskatchewan Government notifi-
 ed Hon. Robert Forke, Federal Min-
 ister of Immigration, last week that his
 province would be unable to take the
 entire Mennonite group. The Sas-
 katchewan Government has yet to announce
 its reply to Mr. Forke's proposal.

According to a Berlin dispatch, the
 German cabinet yesterday decided to
 approach the Russian Government con-
 cerning the more than 10,000 des-
 cendants of Germans who settled in
 Russia 160 years ago and who are about
 to emigrate to Argentina and Canada,
 particularly with reference to about
 2,000 emigres who are reported stranded
 near Moscow.

When the first reports of the Men-
 nonites setting out for Canada with the
 Soviet Government came some weeks
 ago it was stated the Mennonites
 claimed they had been stripped of all
 their possessions by Russian officials,

ENGLISH SOCCER TEAM WINS OVER WELSH PLAYERS

(Continued From Page 1)

London, Nov. 20. (Canadian Press
 Cable)—England defeated Wales in a
 match at Stamford Bridge to-day by
 6 to 0. The game was played under
 ideal conditions, with 20,000
 people in attendance.

Teams representing England and
 Wales have been meeting annually in
 soccer fixtures since 1879 and for the
 series England has won 33 games and
 Wales 6, and nine have been drawn.

Arthur B. Cather
Dies in Vancouver

Vancouver, Nov. 20.—Arthur B.
 Cather, former assistant city clerk of
 the old city of Vancouver, died last
 night.

Born in South Africa forty-eight
 years ago, Mr. Cather came to Canada as
 a child. During the Great War he served
 in the Canadian army in the
 Mediterranean Sea.

After leaving the army, he was
 employed in the city of Vancouver, and
 was a member of the city council for
 several years.

NEWS IN BRIEF

A permit was taken out at the City Hall this afternoon covering the erection of fuel bins for the Cameron Lumber Company, to be built at an estimated cost of \$1,300.

J. A. Pearce of the Dominion Astrophysical Observatory will give an illustrated lecture on astronomy in the auditorium of South Park School Friday evening at 7.30 o'clock.

E. E. Richards will speak on "Cain and the Kingdom of Satan" on Friday evening at 8 o'clock at the British Israel meeting to be held at Book Depot, Surrey Block, Yates and Broad Streets.

"Scandinavia Revisited" is the subject chosen by Dr. E. L. Ellis, president of the University of British Columbia, for his address before the University Extension Association at its meeting in Victoria College to-morrow night at 8.15 o'clock.

The action of Margaret Childs versus L. Nelson and E. Nelson, opened in County Court to-day, with R. C. Lowe for the plaintiff, and Frank Higgins, K.C., for the defendants. The claim is for \$300 over a bill of goods. Judge Lampman presided.

On a charge of stealing a cheque from Fawcett, an employee of the Knapo Lumber Company, W. Washburn was arraigned in Provincial Police Court yesterday afternoon. He was remanded until next Tuesday. Washburn was brought from Calgary to face the charge. He was escorted from the Alberta city by Constable D. Tweedhope.

The Mayor and City Council of 1929 "sat" for a second group picture to-day, when Messrs Foxall and Gibson took a series of poses of the City Fathers at their desks in the Council Chamber. Later the council joined in the presentation of an illuminated address to Mr. and Mrs. E. W. Davies, former caretakers at the City Hall, who have retired after long service.

Mon. Joshua Hinchliffe, Minister of Education, will give an address on school taxation in the province before the Central Conservative Association of the city in the Conservative Club room, Campbell Building, to-morrow.

The minister has been investigating the provincial situation in this respect and is expected to impart his views at the meeting which will be open to the public.

Under the auspices of the Women's Institute, a very enjoyable and much appreciated concert was given Tuesday evening to the patients in the tubercular ward of the Jubilee Hospital. Those who assisted were Miss Grace P. (soprano), Dr. W. W. Bryce (violinist), G. Ingledew (comic songs and recitations), Frank and Arthur Partridge (tenor and baritone), and Mrs. G. W. Deaville, accompanist, and Frank Partridge was responsible for the arrangement of the programme. Refreshments were afterwards served to the patients by the members of the Women's Institute, convened by Mrs. Laird.

The funeral of the late Reginald Allen took place yesterday afternoon, leaving Haywards B.C. Funeral Chapel at 1 o'clock, and proceeding to the Happy Valley Mission Church, where service was conducted by Rev. A. de B. Owen and Rev. H. M. Bolton. Among the large attendance of friends present were H. P. Thorpe, representing the Canadian Legion, Pro Patria Branch. Many beautiful floral designs were received and placed on the casket and hearse. The pallbearers were: J. H. Davies, D. McPherson, P. Trevelin, N. Cann, N. Nelson and A. Cann, all employees of the C.N.R. The remains were laid to rest in the Meicholson Cemetery.

Many friends attended the funeral of the late Mrs. Mary Ann Edwards, which took place on Tuesday afternoon from McCall Bros' Funeral Chapel, Rev. George C. Pringle, assisted by Rev. W. Conley, conducted the service, during which the hymn "Abide With Me" was sung, and the solo, "O Love That Will Not Let Me Go," by Mrs. R. M. McIntosh. Among the many friends attending were Mrs. Gurney, Mrs. Jones, Maurice Thomas and Robert Thomas, representing the Welsh Society. Interment was made in Royal Oak Burial Park, with the following as pallbearers: H. Cotton, Major Edwards, R. H. McIntosh, A. Skidmore, A. H. Edwards and H. Stokes.

The funeral of Major Albert George Sargison, who died at the Royal Jubilee Hospital on Monday evening, will be held to-morrow afternoon at 2 o'clock from Haywards B.C. Funeral Chapel. The funeral will be military in character and interment will be made at Ross Bay Cemetery.

The death occurred in Vancouver yesterday of Miss Emily Sanderson, aged thirty years, youngest daughter of the late Daniel and Mary Sanderson of Sooke. She is survived by two brothers, Robert and Joseph Sanderson of Duncan, and four sisters, Mrs. E. Arden, Miss Mrs. E. Goddell, Victoria; Mrs. D. Stuart, Calgary, and R. Restall, Victoria.

The funeral of the late Louis Goddell will take place on Thursday afternoon at 2 o'clock from McCall Bros' Funeral Home. Interment will be made in Royal Oak Burial Park.

The funeral of the late Mrs. Mary Ann Edwards, which took place on Tuesday afternoon from McCall Bros' Funeral Chapel, Rev. George C. Pringle, assisted by Rev. W. Conley, conducted the service, during which the hymn "Abide With Me" was sung, and the solo, "O Love That Will Not Let Me Go," by Mrs. R. M. McIntosh. Among the many friends attending were Mrs. Gurney, Mrs. Jones, Maurice Thomas and Robert Thomas, representing the Welsh Society. Interment was made in Royal Oak Burial Park, with the following as pallbearers: H. Cotton, Major Edwards, R. H. McIntosh, A. Skidmore, A. H. Edwards and H. Stokes.

MANSON WILL URGE NEW ROAD IN CHILCOTIN

Some Good Roads in Riding But Long Way to Go Yet, Veteran Politician Says

Michael Manson, veteran politician and member for the constituency of Mackenzie, is going after more roads to open up his wide-flung riding, he announced to-day at the Dominion Hotel, following his arrival in the city from his home at Stag Bay.

"There are some excellent roads in the Powell River district but we have a long way to go yet," said Mr. Manson.

When the Legislature meets early next year he proposes to advocate the construction of about 100 miles of highway between Bella Coola and Hainan Lake, which, he claims, will open up a rich section of the Chilcotin country.

He confidently expects to get this work started next year to penetrate a rich mineral field and give the farmers of the territory a much-needed outlet to the coast.

Mr. Manson is here for to-morrow's caucus but has no intention of attending the Kamloops convention, he says.

SEAFARING STOCK

For the last thirty years Mr. Manson has been active in the political life of the province. He comes from a seafaring stock of the Shetlands and was himself a master mariner in former years. He retired from the sea in 1899 to take charge of the shipping department of the Wellington Colliery Company at Comox, at that time owned by the late Hon. James Dunsmuir. He retired from that post the year following and entered the political arena. He was elected to represent the Comox constituency in the British Columbia Legislature from 1909 to 1912. Defeated in 1912, he was elected in the riding of Mackenzie in 1924 and re-elected in the general election of 1928. His home at Stag Bay is fourteen miles from Powell River. Mr. Manson's constituency takes in all the important pulp and paper manufacturing plants of the coast.

PIONEERS OF NANAIMO PASS

John Marwick, Stephen Coburn and Mrs. Mary Cork Die at Up-Island City

Special to The Times

Nanaimo, Nov. 20.—Death occurred at 4 o'clock this morning of John Marwick, a native of Scotland, aged eighty-seven. He had been a resident of Nanaimo for the past twelve years and of the province since 1882.

The late Mr. Marwick is survived by three sons, William of this city, John of Victoria, and James of Vancouver, and one daughter, Mrs. H. Lomas, of Nanaimo.

Stephen Robinson Coburn, aged seventy-three, and a native of New Brunswick, passed away at the family residence, Richards Street, this morning, after several months' illness. He was a resident of this city for the last forty-three years. Jenkins Undertaking Parlor has care of funeral arrangements which will take place Saturday. Besides his wife, the late Mr. Coburn is survived by his son Allen, of Nanaimo, and two daughters, Miss Edna at home, and Mrs. A. R. Parkhurst, of Pasadena, California, at present at home here.

The death occurred here shortly after noon yesterday of Mrs. Mary Ann Cork, aged sixty-six, and a resident of this city for the past eleven years. She was survived by her husband and four daughters, Mrs. Charles Munro, of Wellington; Mrs. K. Gordon, of Nanaimo; Mrs. A. Allen, of Drumheller, Alta.; and Mrs. D. Macleod, of Lulu Island, B.C. The late Mrs. Cork is survived by her son Allen, of Nanaimo, and two daughters, Miss Edna at home, and Mrs. A. R. Parkhurst, of Pasadena, California, at present at home here.

Y.M.C.A. Problems Similar All Over World, Says Fidler

Substituting for J. Trace, who was unable to give his address before the Y.M.C.A. Religious Education Council of the Borneo Work-Bodies, Fidler gave the club members a talk on his impressions of the international convention of Y.M.C.A.s in Helsinki, some time ago.

"He noted that the problems facing the local and other Canadian associations were similar to those facing the Y.M.C.A. of other nations. Irrespective of age or color the organization had to cope with the same questions among young men all over the world," he said.

Great interest was shown during the convention in the world brotherhood aspect of the Y.M.C.A. Mr. Fidler stated. During his talk he spoke in some detail on this phase of the association's activities and gave several helpful hints on various questions.

At the conclusion of the meeting J. McPherson, president of the club, thanked Mr. Fidler for his address.

DISTILLATION OF REFUSE IS TO BE TESTED

City Garbage May Have High Reclamation Value, It Is Claimed

System to Be Given a Test Without Expense to City at Garbally Grounds

Under the supervision of F. M. Preston, city engineer, the city is preparing to make extensive tests with a new system of garbage reduction, at the Garbally grounds. The process, to a certain point, is similar to the latest methods in the use of distillation retorts, but differs materially in the use of a patented device controlled by Marius P. P. Ellis.

Of chief interest in the system is the indicated production of tar, tar derivatives, ether, motor fuel, and gases, as well as a valuable bi-product of refuse that goes into a city garbage pail. The city is negotiating with Mr. Ellis under proposals which will give him the use of ground on which to erect a test plant. The experiment may be conducted for six months under city supervision.

Samples of bi-products taken from a small test plant in operation at Seattle were shown by Mr. Preston to-day. Tar, oil, bone and vegetable charcoal, ether and all the range of bi-products normal to gas production are said to have resulted from actual tests in Seattle and Vancouver.

In addition, it is stated, sufficient gas remains over to supply the heat required by the process, making it self-supporting to some extent.

The refuse is distilled under low pressure and low temperature. It is claimed for the system that an actual ton of refuse at 4.30, after being cleaned of commercial bi-products from the distillation of garbage.

Mr. Preston, who has been negotiating for a test for seven or eight months, stated to-day the city was making plans to put the process to a practical trial. Straight incineration costs \$2.50 per ton, and if a reclamation value of a like amount were realized the system would become self-supporting. A reclamation value as high as \$2.00 a ton is claimed for the system by its originators.

The tests will be made without expense to the city and the plant will be ready for its trial runs early in the New Year.

EGYPT RECALLS TWO MINISTERS

Cairo, Egypt, Nov. 20.—A royal decree, today, announced that Mahamoud Esmail Pasha, Egyptian Minister at Washington, and Sabek Menen Pasha, Egyptian Minister at Rome, had been relieved of their posts.

Stubborn Coughs Ended by Recipe, Mixed at Home

Here is the famous old recipe which millions of housewives have found to be the most dependable means of breaking up a stubborn, lingering cough. It takes but a moment to prepare and costs little, but it gives real relief even for those dreaded coughs that follow severe cold epidemics.

From any drugist, get 2½ ounces of Pine, pour it into a 16 oz. bottle and fill the bottle with plain granulated sugar syrup or strained honey. Thus you make 16 ounces of better remedy than you could buy ready-made for three times the cost. It never spoils and tastes so good that even children like it.

Not only does this simple mixture soothe and heal the inflamed throat membranes with surprising ease, but also it is absorbed into the blood; and acts directly upon the bronchial tubes, thus aiding the whole system in throwing off the cough. It loosens the germs laden phlegm and eases chest soreness in a way that is really astonishing.

Pine is a highly concentrated compound of genuine Norway Pine, containing the active agent of creosote, in a refined, palatable form. Nothing known in medicine is more helpful in cases of distressing coughs, chest colds, and bronchial troubles.

Do not accept a substitute for Pine. It is guaranteed to give prompt relief or money refunded.

(Adv.)

But They Ate

She: Isn't the moon lovely to-night? Do you know it always fills me with hunger for something?

He (hastily): Let's dance.

More Santa Claus Letters

The Victoria Times offers a prize of \$25 for the best letter of not more than 150 words telling just why you know there is a Santa Claus. For the letter which is judged second to the best there is an award of \$15; the third prize is \$10 and the fourth \$1. For the next five letters to receive honorable mention The Times will give \$1.

There is only one condition attached to the contest. You must be less than twelve years old.

All letters must be received at the office of The Times not later than midnight of Wednesday, November 20. Announcements of the winners with their letters will be made the following Monday, November 25.

Now is the time to get busy. There certainly is a Santa Claus and all the world knows that he lives right on top of the world, way up at the North Pole.

Of course, there are some little boys and girls who don't think there is a Santa, but that is just all they know about it. You can prove it to them now that you know there is one and he will come to see you at Christmas and with the money from your letter you can buy lots of presents and candy.

Address your letter to the Santa Claus Editor, The Victoria Daily Times, and be sure you mail it in plenty of time.

time. Then watch The Times for your name among the winners.

ONLY ONE WHO COULD DO IT

1644 Craigdarroch Rd.
Victoria B.C.
Oct. 29, 1929.

Dear Editor:
I know there is a Santa Claus because I read in a book that a little boy went and saw him.

And on Christmas Eve my mother put cake and wine on the table and on Christmas morning its gone.

He was born on Christmas morning and will never, never die.

He also is the only one that could make such nice toys. I saw him in Hudson Bay and told him what I wanted and on Christmas morning I got what I wanted.

He has Elves, Gnomes and Fairies to help him make the toys.

I know there is a Santa Claus because they could not make models perfectly without seeing him.

BARBARA WINSLOW

THEN THEY WILL KNOW JOAN

1627 Chandler Ave.
City
Nov. 2, 1929

I know there is a Santa Claus because I see him every year when he visits Victoria.

He wears a red suit and has long white whiskers. He loves all good little girls and boys and tries to give them all the things they ask for at Christmas. On Christmas Eve when all the children are asleep he comes down the chimney and puts presents on the beds and in the stockings. After Christmas he returns to his home in the far north.

MARGARET GOT A LETTER
SIGNED BY SANTA

834 Pembroke St.
Victoria B.C.
Nov. 3, 1929.

Dear Mr. Editor:
I know there is a Santa Claus because I saw him at the Hudson Bay.

He came to our house and my sister wrote a letter and put it on the mantle and put the pen and ink near it. In the morning I got up and saw my stockings filled with lots of nice things and our Christmas tree was all fixed up with lots of toys on it. The letter was signed by Santa and nearly every thing we asked for that is why I know there is a Santa Claus.

Margaret Ross
Age 11.

HE GOT A SCOOTER

66 Lewis St.
Victoria B.C.
Oct. 29th.

Dear Times:
I know there is a Santa Claus because I have seen him every Christmas.

I was born, and I am seven years old now.

Last year I saw him in Spencers' parade and afterwards shook hands with him in his big house in the store.

He came to our house on Xmas Eve and my stocking was quite full of lovely toys, and left me a scooter. I love Santa with his jolly red face. He brings me extra nice toys, because my birthday is at Xmas.

It is a good thing Santa will bring me a dump-cart and a sandy-andy this year. We would be lost if there was no Santa. I love him and so does my sister. She would like a bicycle if Santa brings any down this year.

Good-bye now Time
Yours truly
Philip Jeffery
age seven

"COME AND SEE MY TOYS"

May
McDonald

Victoria B.C.
Age 8 years old.

Dear Editor:
I believe in Santa Claus because he brings me toys and the ones who do not believe in Santa should come and see all the nice toys on Christmas day and put all the nice toys on the tree.

Last Christmas I happened to wake up and see him and that is why I believe in Santa Claus.

SAW HIS PHOTO
TO THE EDITOR
VICTORIA TIMES

I KNOW THERE IS A SANTA CLAUS BECAUSE I SAW HIS PHOTO IN THE TIMES PAPER.

HE IS FAT WITH A LITTLE ROUND FACE WITH LONG WHISKERS.

I SAW HIM AT THE ARMY AND NAVY XMAS TREE HE KISSED ME.

YOUR FRIEND
REITH BENNETT

GOES TO PARADE
Nov. 8-1929

Dear Editor:
The reason I believe in Santa Claus is because I have seen him at the Hudson Bay, and Spencers and every year I go to his parade. I am six years old and go to Bank St. School. Last Christmas Santa Claus brought me a bicycle and a fire engine. So I know there must be a Santa Claus. I am trying to be a good boy so Santa will come to see me this Christmas. We just had our chimney cleaned so he won't get dirty coming down. I have got a baby brother now and I hope Santa will bring him something to be as small to write so I will write to Santa for him. He is a good baby I love Santa Claus and I hope he will come soon. I wish everybody a very happy Christmas.

with love to Santa Claus

SENDS A PHOTOGRAPH

54 Howe St.
Victoria B.C.
Nov. 3rd 1929

To Santa Claus Editor
Dear Sir:

We have seen in your paper that you are giving prizes for the best letter written about Santa Claus. We thought we would like to try for one so we will tell you how we and our sisters and brother have seen him and we also send you a photograph taken by our Mother as he came through the snow one Xmas morning with his bag of toys showing that what we say is true.

Two years ago he came again to see us on Xmas Eve and always on Xmas morning we find our stockings filled to the top so know he must be real.

Will you please print this picture of him in your paper to show other children that he really does come. We always see him in Hudson's Bay Store and last year he sent us a real letter.

Philip John Moore, age 9 years.
Mary, Maureen, Moore, age 10 years.

New Ointment Quickly
Relieves Itching, Burning,
Inflammation

No matter what else you have used, just try "Sootha-Salva." This prescription of a famous physician has brought such quick relief to thousands of sufferers that you can count on it soothing the itching and burning, healing the raw surfaces, and completely curing your skin of torturing Eczema. 50c at all drugists.

It costs you nothing if you do not benefit. After using two boxes of Sootha-Salva, if you are not satisfied, just return the empty box to Fruit-a-trees Limited, Ottawa, Ont., and we will refund your money. (Adv.)

often see his picture in the Victoria Daily Times. It will soon be time for him to come to Victoria again and then all boys and girls who do not believe there is a Santa Claus should go and see him. Then, they will know there really is a Santa Claus.

Joan Tuckwell
8 years old
1637 Chandler Ave.
City.

A VERY GENEROUS MAN

Nov. 4, 1929

My Dear Sir:

I believe in Santa Claus because I have seen him in stores and asked him for toys, and I have always got what I asked for. He is also very generous in filling my stockings. I hope the great explorer who is going to search for him will be successful. I am hoping to see the movies on the return of this expedition.

Yours truly,
Jean Mair,
Age 10.

MARGARET GOT A LETTER SIGNED BY SANTA

834 Pembroke St.
Victoria B.C.
Nov. 3, 1929.

Dear Mr. Editor:
I know there is a Santa Claus because I saw him at the Hudson Bay.

He came to our house and my sister wrote a letter and put it on the mantle and put the pen and ink near it. In the morning I got up and saw my stockings filled with lots of nice things and our Christmas tree was all fixed up with lots of toys on it. The letter was signed by Santa and nearly every thing we asked for that is why I know there is a Santa Claus.

Margaret Ross
Age 11.

HE GOT A SCOOTER

66 Lewis St.
Victoria B.C.
Oct. 29th.

Dear Times:
I know there is a Santa Claus because I have seen him every Christmas.

I was born, and I am seven years old now.

Last year I saw him in Spencers' parade and afterwards shook hands with him in his big house in the store.

He came to our house on Xmas Eve and my stocking was quite full of lovely toys, and left me a scooter. I love Santa with his jolly red face. He brings me extra nice toys, because my birthday is at Xmas.

It is a good thing Santa will bring me a dump-cart and a sandy-andy this year. We would be lost if there was no Santa. I love him and so does my sister. She would like a bicycle if Santa brings any down this year.

Good-bye now Time
Yours truly
Philip Jeffery
age seven

"COME AND SEE MY TOYS"

May
McDonald
2538 Rose Street
Victoria B.C.
Age 8 years old.

Dear Editor:
I believe in Santa Claus because he brings me toys and the ones who do not believe in Santa should come and see all the nice toys on Christmas day and put all the nice toys on the tree.

Last Christmas I happened to wake up and see him and that is why I believe in Santa Claus.

SAW HIS PHOTO
TO THE EDITOR
VICTORIA TIMES

I KNOW THERE IS A SANTA CLAUS BECAUSE I SAW HIS PHOTO IN THE TIMES PAPER.

HE IS FAT WITH A LITTLE ROUND FACE WITH LONG WHISKERS.

I SAW HIM AT THE ARMY AND NAVY XMAS TREE HE KISSED ME.

YOUR FRIEND
REITH BENNETT
1152 CHAPMAN ST.

GOES TO PARADE
Nov. 8-1929

Dear Editor:
The reason I believe in Santa Claus is because I have seen him at the Hudson Bay, and Spencers and every year I go to his parade. I am six years old and go to Bank St. School. Last Christmas Santa Claus brought me a bicycle and a fire engine. So I know there must be a Santa Claus. I am trying to be a good boy so Santa will come to see me this Christmas. We just had our chimney cleaned so he won't get dirty coming down. I have got a baby brother now and I hope Santa will bring him something to be as small to write so I will write to Santa for him. He is a good baby I love Santa Claus and I hope he will come soon. I wish everybody a very happy Christmas.

with love to Santa Claus

SENDS A PHOTOGRAPH

54 Howe St.
Victoria B.C.
Nov. 3rd 1929

To Santa Claus Editor
Dear Sir:

We have seen in your paper that you are giving prizes for the best letter written about Santa Claus. We thought we would like to try for one so we will tell you how we and our sisters and brother have seen him and we also send you a photograph taken by our Mother as he came through the snow one Xmas morning with his bag of toys showing that what we say is true.

Two years ago he came again to see us on Xmas Eve and always on Xmas morning we find our stockings filled to the top so know he must be real.

Will you please print this picture of him in your paper to show other children that he really does come. We always see him in Hudson's Bay Store and last year he sent us a real letter.

Philip John Moore, age 9 years.
Mary, Maureen, Moore, age 10 years.

A High Average

An Englishman, travelling in Canada for the first time, asked the porter "what is the average tip in this country?"

"De average tip in this country, Sur, am one dollar!"

In the morning the Englishman gave him a dollar.

"Thank you, Sur," said the darky, "you am the first gentleman which has ever come up to de average."

It's a great thing to keep up the average. The average of the Marguerite has always been high—and always maintained. I know—for I've smoked Marguerites for years.

CONSERVATIVES GATHER IN CITY

Caucus in Victoria Before
Annual Convention in
Kamloops

British Columbia Conservatives are assembling in Victoria to-day ready for the party caucus which will open tomorrow preparatory to the annual convention which opens in Kamloops on Saturday. Business of the next session of the Legislature will be the main business of the caucus Thursday, it is understood. Federal politics are scheduled as the main subject of discussion at the Kamloops convention.

In addition to the members of the convention who attend as members of the Senate and House of Commons representing British Columbia ridings, and as members of the Legislature of the Province, the defeated candidates in either of the representative bodies and members of the executive there will be representatives of the various legislative districts which have the

right to name one delegate for each member the riding sends to the Legislature.

The delegates from Victoria elected to attend are Lady McBride, Mrs. H. Brown, Lindsay Crease, K.C., and R. H. Powell. Lady McBride has been taken ill and may not be able to attend, so that a substitute, Mrs. M. J. Roberts, may sit in the convention. R. A. Wootton, president, will also attend. Saanich will send as its delegate, W. O. Wallace, the president of the association.

Esquimalt will send its president, Reeve Elrick. Mrs. S. R. Bowden of Esquimalt, will attend as a member of the central executive.

STUDENTS ARE EXPELLED ON RUM CHARGES

Urbans, Ill., Nov. 20.—Twenty-one University of Illinois students were expelled at a meeting of the university council of administration yesterday. The expelled students were charged with having been involved in last week's campus liquor scandal. The council was ordered to show cause why it should not be disbanded.

Santa has thousands of Gnomes that do nothing else but keep records of children and their deeds. As you will see in to-day's story the Boy Scouts alone keep Santa and his Gnomes busy recording good deeds and awarding them at Christmas.

EXPLORERS SEE GREAT GIFT SHOP OF SANTA CLAUS

British Columbia Room in Gigantic Factory and
Wonderful Preparation for World Tour of St.
Nicholas Astounds Kleinschmidt Party.

By CAPT. F. E. KLEINSCHMIDT
Special Correspondent to The Victoria
Times and Head of the Expedition to
Home of Santa Claus

By Wireless

Santa's Castle at the North Pole.

It seemed we traveled for miles and miles through the gigantic gift shop, but we never grew tired looking at the many different gifts, for there is always something new, unique or marvelous in the new creations and inventions Santa produces in the toy line every Christmas.

Finally Santa said: "Now let us start

at the bottom," and he led the way to a moving stairway or escalator, as you have seen in department stores, only they worked much swifter, and descending we had glimpses of floor after floor of all kinds of rooms where armies of gnomes—and fairies—were working, shaping wood and steel, assembling, molding, painting and packing things.

At last we came to the bottom. The first thing we noticed the chief gnome, who greeted Santa, and all his fellow workers, were clad in machine-made uniforms.

His GREAT POWER HOUSE

"This is my great power house."

Santa explained. You have all heard of the axis of the earth which points to the Polar Star, and on which the world spins around. I have connected my machinery with this axis and the power that spins the earth drives all my machinery, the lathes and saws and grills, for you know it takes a lot of power to manufacture toys for over fifty million children each year.

Great turbines were turning huge fly-wheels. Gigantic dynamos emitted electric flashes and sparks and pulling long leather belts. Hydraulic presses were pushing up huge pistons, wheels on wheels and inside of wheels, cables and shafts and belting, buzzing and turning and moving in all directions, but there was order about everything, and you felt the great mind of a genius behind it.

We went up again, but this time on an elevator, and as we passed one floor after another we noticed instead of numbers the names of different countries. On the top floor we read "Canada," and at a sign from Santa the gnomes stopped the elevator.

Here was a large room with countless desks on which gnomes were writing in books. Shelf upon shelf was piled with books, like a huge library, but they were not story books, but ledgers, numbered and alphabetically arranged. The room was divided into sections and each section bore the name of a province in Canada. The Province of British Columbia occupied only a small space, but so did Alberta and Saskatchewan, while Ontario took up a great part of the whole room. You can easily guess the reason. It was not the size of the province that counted, but the number of children in each province, and the books were records in which the deeds of the children were recorded and how they improved from year to year.

"You are from Victoria, and here you are," Santa laughed, and sure enough we found Victoria labeled.

"Now, let's see," said Santa, and he took a book, turned over the pages, and to our amazement there was written The Victoria Times wants to make boys and girls happy on Vancouver Island. Santa sent out an expedition to Santa Claus land. And there were the names of the boys and girls who had written letters to The Times. Even some of the letters I had brought with me.

MAGIC OBSERVATORY

"How is this possible?" Mrs. K. exclaimed. "How I manage to keep watch over the children?" Santa asked. "Well, you will find out before you leave and see my Magic Observatory."

Then Santa asked the gnomes "What has little Eric Bearpaw done to-day?" The gnome turned over some ages and then read: "He helped his mother wash the dishes, swept the kitchen and minded his little brother for an hour." That pleased Santa and he said: "Mark on the margin—A good present for Eric."

I glanced over some of the books marked Victoria, and there saw the names.

"BOY SCOUTS"

"The world is increasing in population and is getting better all the time, and with it my work grows larger and larger every year. It makes me happier the longer I live, but you know," and Santa's eyes twinkled, "the children who give me more work and who keep the pens of my gnomes the busiest in chalking up good deeds are the Boy Scouts. Look at that row of books, all marked 'Boy Scouts.' Ever since that wonderful organization started, I have had to put on a thousand extra gnomes each year."

We were somewhat tired from our last ride, and our eyes and minds were getting sleepy from all the wonderful sights we had been seeing. Mrs. K. was wondering where we were going to sleep, for the castle certainly never had expected any guests and the beds we had seen were so tiny no human being could possibly sleep in them. But Santa, who is quick to anticipate the wants and wishes of children, had already provided for our needs.

ESKIMOS AMAZED

Gnomes and fairies had prepared fairy-like bedrooms, and our Eskimos stood gaping in wonder when they beheld their quarters.

Mrs. K. ran from one piece of furniture to another. Pulling open drawers looked into the mirrors and fingered the gossamer-like curtains and lace the fairies had put up for her, and even a powder puff, curling iron and perfume were there.

All at once she gave a gasp and sat down on the bed laughing until she could not speak. I could not see anything to laugh at, but a beautiful eiderdown blanket covered with silk lace, until she pointed to the foot of the bed, and I examined it closely, and above all things, the beautiful wrought iron legs were thick colored candy sticks. The bed panels that looked like polished bird's-eye maple was taffy full of nuts. What looked like a wonderful mahogany dresser was made of chocolate, and the knobs were nuts. The mirrors were rock crystal candy. I recalled the fairy tale of Hansel and Gretel and the witch who lived in a gingerbread house, but I never as a grown-up man expected to live in a similar house.

Keep Your Youthful Figure

Her friends chuckle behind her back when she puts on excess weight.

Greater nourishment from
less food—more strength
with less weight

Delicious, nourishing Bovril, replacing a portion of heavy, bulky foods in the daily diet gives needed strength without endangering the graceful lines of the figure.

A little Bovril makes a lot of difference through its unique power to make ordinary food more nourishing and because it helps you avoid clogging your system with surplus food that encourages fatty tissues.

You will feel more energetic and vigorous and will be better able to resist illness, and . . .

You are sure of adequate nourishment if, every day, you eat less heavy food and drink a little more Bovril.

BOVRIL

Builds Strength Without Fat

Preparators: Bovril Ltd., Park Ave., Montreal. Sales Agents: Harold F. Ritchie & Co., Toronto

Ganges

A large crowd witnessed the football game between a Salt Spring Island team and the Victoria Wests who, together with a party of supporters, arrived by launch on Sunday. The game was played on the Mahon Hall grounds.

The first half ended 2-1. On resuming some good play followed on both sides and within five minutes of time the game stood 4-1. Salt Spring scored another goal just at the end, making it 5-1 in favor of Salt Spring. The Victoria players were entertained to supper at Harbor House.

Mr. and Mrs. J. McIntyre of Royal Oak are spending a holiday on Salt Spring, the guests of Mrs. McIntyre's brother and sister-in-law, Mr. and Mrs. H. Smith, Ganges.

Mrs. Macintosh of "Madrona," Ganges Harbor, has been visiting in Vancouver this week.

Mrs. Burnett, Fulford Harbor, was a visitor to Victoria on Friday.

Mrs. J. MacLaren of Victoria is visiting her brother, H. Smith of Ganges, for a few days.

Mrs. Moorhouse, Ganges, left on Friday for Victoria.

Mr. and Mrs. C. Wetherell, who have been in Victoria for the last three weeks, returned to their home at Ganges Harbor on Tuesday.

Mr. Catterall returned to Vancouver on the Princess Maquinna on Tuesday, after having been the guest for two weeks of his sister, Mrs. D. Tweed, at Ganges.

Miss Violet Akerman returned on Tuesday from Victoria, where she has been spending a holiday with friends.

Rev. G. W. Dean and Miss Helen Dean, who have been spending two or three weeks in Victoria and Vancouver, have returned to their home on Ganges Hill.

Mrs. Manson, Ganges, has left for Vancouver, called away by the serious illness of her sister, Mrs. Mercer.

Mrs. S. M. Case of Los Angeles, Cal., who has been spending a holiday with relatives at Burgoyne Valley, has returned home.

Major Godfrey of the Soldiers' Sol-

tlement Board spent a few days at South Salt Spring recently, a guest at the White House, Fulford Harbor.

Mrs. T. Reid of Fulford has purchased for her son, J. Reid, the property belonging to W. McAfee, situated near "Riversdale" at Booth's Canal. Mr. and Mrs. J. D. Reid will make their home there on their return from their honeymoon.

From Mother of Six

"I think Lydia E. Pinkham's Vegetable Compound is wonderful. I have had six children of which four are living and my youngest is a bonnie baby boy now eight months old who weighs 23 pounds. I have taken your medicine before each of them was born and have certainly received great benefit from it. I urge my friends to take it as I am sure they will receive the same help I did."

—Mrs. Milton McMullen, Vanessa, Ontario.

What Does It All Mean?

Stewart's New Shoe Store, --- 1613 Douglas St.

The Sensation of 1929 in the Mercantile History of Victoria is Our Great

SWEEPING VICTORY SALE

Which will open one of the most startling and most bewildering masses of matchless values and real savings ever before witnessed by man, woman or child. The sceptical who attend will go away mystified at such real values.

Our Message:

We have never misled the public during our many years in business in Victoria, nor do we ever intend to mislead you now; but owing to the backward weather conditions it has made it intolerable for us to keep our \$15,000 stock of Men's, Women's and Children's Shoes on our shelves any longer. "Forced" by circumstances we must raise a large amount of cash "at once." A chance once in a lifetime for you all.

Stewart, owner.

STEWART'S NEW STORE.

1613 Douglas Street

"Hello" Central!

Give me Stewart's New Shoe Store at 1613 Douglas Street, Phone 2405.

The Big Ben clock isn't in it when it comes to getting people up—for this slaughter sale will put all alarm clocks out of a job. "Bargain Carnival" to-morrow morning commencing at Nine o'clock.

They Are Telephoning! They Are Guessing! Yes, and Wondering!

SALE STARTS 9 A.M. THURSDAY

FREE!

Thursday morning as the doors of this establishment swing open we will give to the first fifty adults fifty sealed envelopes. In these sealed envelopes are ten numbers that obtain for you a nice present absolutely "free." It doesn't require any purchase to get one of these numbers, only your presence. These are the numbers:

2 4 6 8 10 12 14 16 18 50

A FREE PRIZE

To any person calculating the correct number of shoes the barrel contains, that is now in our show window, will be given a prize worth while at 3.30 Saturday, November 23. Write your name and address on back of sales slip and drop same in the deposit box in the store.

TO-DAY'S GRAIN MARKETS

WHEAT EXPORTS
 Washington, Nov. 20.—Grain exports from the United States for the week ended November 16 were 2,044,000 bushels as compared with 1,489,000 bushels in the corresponding week of last year. Wheat exports for the week ended November 16 totaled 2,561,000 bushels as compared with 1,730,000 bushels; barley 413,000 bushels, against 40,000 bushels; corn, 260,000 bushels, against 98,000 bushels; oats, 64,000 bushels, against 81,000 bushels; rye, 60,000 bushels, against none.
 Canadian grain in transit cleared from United States ports totaled 900,000 bushels, all wheat, as compared with 1,130,000 bushels during the preceding week.
 United States wheat flour exports totaled 288,000 barrels for the week ended November 16, compared with 180,000 barrels during the preceding week.
 Canadian wheat flour shipped from United States ports totaled 16,000 barrels, against 32,000 barrels.

Washington, Nov. 20 (Solloway-Mills Service).—Wheat prices are likely to begin to improve within a week and can be considerably above the present prices by January and February, according to a statement issued here by the Department of Agriculture.

INFLUENCE IN MARKET
 Chicago, Nov. 20 (Solloway-Mills Service).—The way big orders were placed the last few days, suggested that a prominent Wall Street operator was furnishing the buying. The Chicago Tribune today says it will be no surprise to hear of a large order of a tentative stabilizing order issued by the government and prices advanced. But prices have now been up nearly 14 cents from last week's low. It is said the short interest was materially reduced on the late bulge yesterday. Those who are bullish say it would be better to hold wheat prices down around the present level so that large sales can be made abroad and stocks reduced in a way that will attract more outside trade. Others say there has been a broader speculative interest in the market, particularly on the part of professionals who may not stand on their holdings in case of a weakened technical situation.

HOW ABOUT THIS?
 Chicago, Nov. 20 (Solloway-Mills Service).—Uhlmann Grain Company today says: "As rust hardly does much damage to wheat, it is being mostly a spring wheat disease, we believe Argentine rust reports are exaggerated, and if not, we would consider it a novelty."

LIVERPOOL EASIER
 Winnipeg, Nov. 20 (Solloway-Mills Service).—The Observer today says: "Liverpool cables came weaker today than last. Wheat is due for a setback pretty soon. Nevertheless, we prefer the buying side on breaks until the Argentine crop is out of danger."

(By Branson, Brown & Co. Limited)
 Winnipeg, Nov. 20.—Wheat: The bulls in wheat received a setback today when Liverpool refused to bid the bulge of almost 5 cents in this market yesterday and while opening more than 2 cents up, about as due, it eased off and closed 1/4 to 1/2 lower. Buenos Aires also added to the trouble by declining 1 1/2 by noon. Winnipeg opened about one cent lower and gradually sank until prices were 3 1/2 under the close last night and the market seemed just as weak on the break as it looked strong at the finish yesterday, but some short covering in the last half hour firmed up the market, but the bulge was not held, prices again declining to around the low spots.

There was considerable liquidation going on during the day and part of the holdings of one important interest was believed to have been thrown out. There was some fair buying at times, part of which was credited to foreign account but export sales over night were very small and practically nothing could be confirmed here.

The local cash market was again very quiet and about the only demand was coming from American millers for No. 3 Northern and No. 6 wheat.

News from the Argentine continued bullish with several reports from private sources telling of the prevalence of rust and damage, but these reports had little effect and the general opinion was that the damage had been discounted by the upturn in prices the last few days. Europe will probably require considerable North American wheat the next two months, but they appear to be well supplied with large stocks at present.

Coarse grains—Markets were quiet with prices being affected by the weakness in wheat. There was some further business in oats to eastern Canada, but there was nothing doing in barley or rye.

FLAX—There was no feature to this market. There was a little liquidation going on and prices closed from 5 to 1/2 lower.

SEVEN BIG STOCKS OF EASTERN MARKETS

Vancouver, Nov. 20.—Seven of the chief stocks on the eastern Canadian exchanges were listed today for trading on the Vancouver Stock Exchange. They are: Falconbridge Nickel, International Nickel, Noranda, Sudbury Basin, Sherritt-Gordon, Teck Hughes and Ventures.

Vancouver, Nov. 20 (Solloway-Mills Service).—Whitewater is preparing to increase its capital from 1,200,000 shares to 2,000,000 shares at its general meeting in Kaslo, B.C., on December 20. Increase is for the purpose of development and enlarging the mill to produce at low prices. It will also be used to repay the temporary advance on the present work and, it is hoped, to retire the preference right of 60,000 on the 100,000 preference shares now outstanding. The right is contemplated will give one share for 30 cents for each share held.

Vancouver, Nov. 20.—Mines all held their own and were fractionally stronger on the Vancouver Stock Exchange today.

In the oil, Sterling Pacific, on the good news from Calgary, advanced 15 points from yesterday to 130. Mayland was again active between 3.00 and 3.50.

Consolidated Petroleum, also gained, rising 25 points to 240.

East Crest gained 10 points or so to 178.

WHITNEY LETTER

(By Bradford, Brown & Co. Limited)

New York, Nov. 20.—Whitney of Wall Street Financial Bureau says today:

ADVANCE TO CONTINUE

"For the first time in weeks we have a normal market and logical action to interpret rather than a hysteria to attempt to measure, and consequently an outline of future market action can be forecast with a greater degree of certainty than has been possible, at least within the last thirty days."

"I believe that the standing surprise element in the market will be the extent of advance which is recorded in the next thirty days, and that subject to the usual short interruptions, the trend will be approximately as follows:

"Monday's hesitancy having served to consolidate the advance which has been recorded thus far, I look for the market to continue its advance in an orderly manner until both the rail and industrial averages have added approximately twenty points to the level at which they stand this morning. This may well consume a period of the next twenty-five or thirty days, at which time and at which level another consolidating movement will be necessary, arriving at a time which will approximately coincide with the appearance of the usual December tax selling. Thereafter look for a third phase of advance which will consume the greater portion of the month of January, during which a high point should be established which will represent a recapture of approximately sixty per cent of all of the decline which has been recorded since Labor Day."

"I do not believe that the period of relative dullness which is so widely heralded will develop before the middle of next month, when the average level, as previously stated, is expected to be some twenty average points beyond the existing level."

"Obviously, adhering to the belief expressed on each and every one to two day reaction, translating this average price movement into something which can be watched more closely than the average, would say that the period of relative dullness should not be recorded until steel has come into the range of 175-180, and American Can 125-130."

"Money has already become virtually unobtainable. Funds were available as low as three and one-half per cent in the outside market yesterday without takers. Subject to a slight hurry at the end of the month draws near, believe that the call rate is down to stay down."

"In the rail group, direct attention to Western Pacific preferred, which is selling below its par value of \$100 in approximately ten years, despite the fact that net railway operating income for the first nine months is sixty per cent ahead of the corresponding period of last year and that approximately twenty-five per cent of the selling price of the stock is represented by the dividend accumulation."

"Recommend continued adherence particularly to the stocks which have been mentioned here in the past week, while nevertheless, considering that virtually anything is still a purchase."

Slower Business Due, But Not Long

Winnipeg, Nov. 20.—Recent stock market collapses may have a tendency to slow up business in the immediate future, but the recession will be only of a temporary nature, commented Henry Detchon, general manager of the Canadian Credit Men's Trust Association, Limited, when he returned today from a two and a half months' visit to Eastern Canada.

"Canada's business today is on such a firm basis that this business recession will be only temporary," he declared. "And the outlook is bright with promise." The break in what he termed "unwarranted speculation" will have a beneficial effect on legitimate business, Mr. Detchon predicted, many such as individuals and firms will have had brought home to them the fact that they must confine their attention to business, which forms the mainstay of the country.

The liner *Maestri* is about 17,000 times the size of the Santa Maria, flagship of Columbus.

Standard Oil Trust Shares

(A fixed trust composed of 181 shares in all 36 Standard Oil Companies)

Each block of 1,000 of these shares is 181 shares of the common stocks of all 36 companies in the "Standard Oil" group, held in trust by The Equitable Trust Company of New York.

When you become an owner of Standard Oil Trust Shares this great New York bank guarantees to pay you the net income from all dividends paid it by these 36 companies.

MONEY DROPS TO 41-2 PER CENT AND STOCKS CONTINUE TO ADVANCE AS NEWS PROVES STIMULATING

New York, Nov. 20 (B.C. Bond).—At the close of the market this afternoon, the Dow Jones average of thirty industrials stood at 241.23, up 7.21 points for the day; and the twenty rails at 145.08, up 2.83 points.

DROP IN MARKET VALUE

New York, Nov. 20.—Market value of all shares on the New York Stock Exchange on November 1 totaled \$71,752,650,903, a decrease of \$15,320,970,515, as compared with the total of \$87,073,630,423 on October 1.

The high record of figures reported each month was on September 1, when total market value of all listed shares was \$89,602,276,945.

Average price of all listed stocks on November 1 was \$4.62, compared with \$3.06 on October 1.

New York, Nov. 20.—Stocks carried on with their rally today, with call money dropping from 5 to 4 1/2 per cent; the lowest official call money rate since August 16, 1928.

It was reported today that money was being offered in some places on call at 4 per cent or less.

Several stimulating factors contributed to pushing the rally on to-day. Among such were assurance that leading railroads planned to make large improvement expenditures in the coming year, a Federal Reserve Advisory Council statement that business and banking conditions were sound with prospects that money would be available at a lower rate.

Following prediction of higher wheat prices by the Department of Agriculture, shares of companies doing a large scale business in agricultural regions such as J. I. Case and International Harvester, were favorably affected.

STEEL OPERATIONS REDUCED

Stocks maintained a strong tone up to the close and U.S. Steel reached new high ground on the recovery in steel of further reduction in operations to seventy-three per cent from seventy-five per cent a week ago.

Other featured pivotal issues were General Electric, Westinghouse Electric and Industrial Alcohol.

Sales for the day totaled 2,819,500 shares.

NOT EARNING DIVIDEND

Shubert Theatres directors today passed the quarterly dividend on the common stock. Although the company has available an earned surplus in the neighborhood of \$2,000,000 and cash in the neighborhood of \$1,000,000, the directors considered it advisable to conserve working capital and to omit a dividend which is not currently being earned. Early in the season labor difficulties with musicians and stage hands kept the theatres closed in several big cities. This and general affected earnings.

BROKER LOAN DROP EXPECTED

Wall Street expects another substantial drop in brokers' loans to be shown in the statement Thursday afternoon, and this will be partly attributable to the known fact that much of the buying in recent days has been for cash.

The New York Times says today:

"The World says it appears reasonable to assume that the market has gone a long way toward discounting probable business recession and that it is possible many stocks during their recovery have not sufficiently discounted either their own favorite position, or the certainty of low interest rates in the coming months."

BUYERS DISCRIMINATING

Buying of stocks continues to be highly discriminating and confined largely to seasoned issues with assured dividend yields, and is comprised largely of outright purchases, according to The Herald-Tribune.

RAIL MARKET BETTERED

Wall Street Mirror issues the following to its clients:

"Anticipation of favorable developments from the first of the Washington conferences brought the trading fraternity into the stock market on the buying side. In view of the fact that the President's session with the railroad executives is expected to stimulate equipment orders and speed rail-road development, a better rail market is logical. The best advice regarding the market, however, is still of a cautious nature."

REYNOLDS TOBACCO STRONG

"Do not rush in on the buying side, and particularly do not follow prices up. The quieting down in the trading is doing much to restore confidence. Furthermore, the desire is becoming less evident to sell."

New York, Nov. 20.—Hartford directors are expected to put New Haven common on a 48 dividend basis; the meeting to be held next Tuesday.

Increase in the dividend on Reynolds Tobacco is expected at the meeting December 5. The stock now pays \$2.40, but earnings in 1930, with increased prices for cigarettes will be twice those payments. Lifting of the dividend rate to \$3 would show a return of more than seven per cent at current levels."

BROKERS' OPINIONS

Fisher and Beane says: "There is little reason to expect an immediate sustained upward in stock prices."

Morrison and Townsend say: "A period of mixed-price movements is likely to be seen, in which over-valued issues will be further liquidated, while accumulation of under-valued stocks will begin."

BANKERS WAITING TO LOAD

In some quarters the opinion is held that a rally might easily develop from current levels which could carry prices for round stock twenty to thirty points higher before the end of the year. It must not be forgotten that a lot of "distress" stock has been taken over during the emergency and just as soon as they can, the banking interests will try to make a market for the stock they were forced to take over during the panic. From his point of view, the market is more likely to rally twenty points from current levels than it is to react ten points during the next month."

TIMKEN OUTLOOK GOOD

Present indications are that Timken Roller Bearing earnings for 1929 will establish a new all-time high record, and it is expected that the final net will come between \$7.50 and \$8 a share. Timken has made excellent progress in diversifying its business, so that the periodic lull in the motor industry do not now affect its earnings to anywhere near as great an extent as heretofore. Its railroad bearing programme is making rapid headway and earnings from this source should become increasingly important with time.

EXPECT TESTING TIME

"As we have pointed out, we do not expect the current recovery movement to be really tested before the end of this week, or the beginning of next week, when blowers and weeks say, 'So we would take advantage of the quiet strength in the meantime to lighten accounts, which were previously uncomfortable, particularly in second rate securities.'"

NICKEL HOLDERS NOW SWITCHING OVER TO NORANDA

Toronto, Nov. 20.—The prevailing sentiment in regard to International Nickel is bullish, according to The Financial Post. The general weakness has proved a drag to improved market conditions for the big Sudbury producer, and the opinion is heard in brokerage and banking circles that lower prices may be anticipated for International Nickel.

A great many small holders are said to be switching to Noranda. Noranda has declared an initial dividend of 7 1/2 cents, which it is believed is the forerunner of the stock being placed on a regular 32 dividend basis in 1930. Assuming this to be the case the stock selling at \$35 would return a yield of better than 8 1/2 per cent.

The nine month statement of International Nickel's earnings for 1929 show that \$1.11 was earned on the common stock in that period. Earnings for the first quarter amounted to 36 cents per share; for the second quarter to 38 cents, and to 37 cents in the third quarter. Earnings are holding steady, so that earnings of approximately \$1.40 to \$1.50 per share may be anticipated for 1929. At the present time, dividend payments for the year will total 90 cents a share, as payments for the first two quarters were at the rate of 30 cents a share, and it is thought the present rate of 25 cents a share will be adhered to for the balance of 1929.

The difference in the yield to be secured from the two stocks has worked to the disadvantage of Nickel in this present trying time of financial depression. Nickel in the past was bought with an eye to future appreciation. The break in the market has made no difference in the great earnings that the company is expected to make when the Frood ore body is brought into production some time next summer, possibly in July. In the meantime, however, speculators and investors are more engrossed with the outlook for the present, and stocks are being purchased with a view to immediate yield.

Holdings of Nickel on margin are therefore being advised to strengthen their accounts to withstand any crash that may come. Those who have purchased the stock outright and are content to have patience, are assured that they have no cause to worry. Nickel today is just as big a mine with as promising a future as when the \$40 population was bullish on this stock and enthusiastic trading carried it up to a high of 72 1/2 a share. But the present reaction may carry it to a new low before conditions again return to a normal state.

The annual damage done by coal strikes in the United States is estimated at two billion dollars.

STERLING PACIFIC REACHES THE LINE: HOME NO. 5 NOW PAST LOST TOOLS

(By Solloway, Mills & Co. Limited)

Calgary, Nov. 20.—Starting next Monday, Calgary Stock Exchange will go on a new time schedule, being open continuously from 9 a.m. to 1 p.m.

Calgary, Nov. 20.—Sterling Pacific reached the line at 5,153 feet today. It is announced by Imperial Oil.

A start is being made today in drilling out the cement plug at Merland No. 1, according to advices from Pat Adams. Interesting news is expected from this well within the next three or four days.

Calgary, Nov. 20.—"Majority of good Alberta oil stocks are now selling at 80 per cent or more below their high price levels," Solloway, Mills says today. "There is really a dearth of stock and with the possibility of a flood of good new coming from several wells, it is not hard to see higher prices prevail. There is the additional important factor that the public is beginning to get the oil bargains and such realization is usually followed by better things."

"Home Oil around \$12.00 is on the bargain counter on an earnings point of view. It is difficult to put an additional speculative valuation on the shares, but three wells now producing make the stock worth more than it is selling for and No. 4 well may join the producer before the year ends."

Calgary, Nov. 20 (Courier, Court wire).—Merland No. 1 is drilling steadily in soft formation and does not expect an increase in gas until hard capping is struck. Last depth reported was 5,888 feet, or 427 feet in the line.

Southern Pacific drilling at 5,881 feet was 153 feet in the time last night. They are still in hard capping and it is quite possible that gas flow may be struck below this in a softer formation.

East Coast No. 1 was drilling last night at about 4,341 feet, when one of the cones plugged on the rock bit. Gas is still blowing and they expect to have the separator hooked up in two or three days and an idea will then be obtained of the wetness of the flow from the top of the line.

Home Oil is apparently tied to be down to twenty feet from the bottom and to have successfully passed the string of tools at this depth. No. 4 is almost ready to start rigging up the diamond drill preparatory to drilling into production in the line.

Margol is making rapid footage again, drilling steadily with rotary at 4,150 feet.

Wouldn't It Save a Lot of Heartache and Disappointment if Every Married Couple Were to Be Given an Official Diagram That Would Chart the Course of Matrimony From the Altar to the Grave?

THE other day the newspapers told the story of a young couple who were going to take their bridal tour in an automobile, and who had a road map printed on the back of their wedding invitations.

Let us trust that this was more than an original idea, that it was a symbolic gesture. For after the marriage ceremony is over most brides and grooms are filled with a panic of bewilderment and fear, and if they voiced the question in their hearts they would ask: "Where do we go from here?"

And it is a thousand pities that there isn't some official diagram that would show them how to get on Route No. 1, and stay on it, and the best and safest way to travel from the altar to their golden wedding.

How many disappointments it would save if their chart showed them, to begin with, that the matrimonial road is not, as they fondly delude themselves into believing, a smooth concrete highway on which they can step on the gas and joyride along with never a bump or a jar, or a puncture or a blowout, but that it is a mixture of good and bad, with many a long stretch of rough and rocky road, where the going is slow and hard, and where they will need every bit of power that they have to pull through!

What a lot of breakdowns in marriage it would save if the young Benedicts were furnished with a diagram that showed them the beginning of the journey was mostly uphill, and that it was the worst and most dangerous part of it. Suppose they were warned beforehand that there were hills of misunderstanding and disillusionment to surmount. Mountains of adjustment that they would have to negotiate, and that there would be years and years of hard work and pinching economies and sacrifices that it would take to climb up to fortune, but that if they had the nerve to make the grade it would be easy coasting for them down the sunny slopes of prosperity.

Don't you think it would give many a disgruntled boy-husband and girl-wife the courage to stick on through the disappointment of finding that marriage isn't a level pathway bordered with flowers, and keep them from turning back and bawling it to the divorce court?

Think what catastrophes it would prevent if the matrimonial road map indicated the many forks of the road where it is so easy for a couple to take the wrong turn and stray off the right route. Business or a career in which a man gets so immersed in making money, or striving for fame, that he forgets he has a wife, and his home comes to mean nothing to him but a place to eat and sleep and change his clothes.

Children who take up all of a woman's time and thoughts and absorb her affections so completely that she is all mother, and no wife, and turns her husband into nothing but a cash register that she punches to pay the bills for her offspring. Or clubs. Or society. Lack of appreciation. Taking each other for granted. Oh, it is mighty easy to get off the right road in marriage, and next to impossible to get back after you have once done so.

And what a lot of trouble would be saved if the matrimonial road map plainly indicated a nice, pleasant, safe detour around the personal idiosyncrasies of husbands and wives. It doesn't take the bridegroom long to bump into nerves, and temper, and prejudices, and disagreeable little ways that he never suspected Maud had concealed about her angelic person. And before she knows it Maud goes slambang up against John's little meannesses and crankiness, and it gives them a jolt that dislocates all of their previous conceptions of the hero and heroine of their romantic dreams.

They are pretty apt to go to smash if they persist in plowing through a road that is impossible, and that the experience of thousands of other people who have come to grief on it shows that one travels at one's own risk. But all would be well if John and Maud would only follow the detour sign and steer around each other's little peculiarities of disposition instead of crashing headlong into them; if John would only shut Maud's mouth with a kiss instead of trying to convince her in an argument, and if Maud would only jolly John along the way she wants him to go instead of trying to drive him into it.

And how invaluable to the young married couple it would be if the road map erected a few danger signals along the hairpin curves in wedlock where one is so liable to skid and go over the brink of the precipice, unless one drives carefully and slowly. Going at too fast a pace. Trying to make a flivver keep up with a Rolls-Royce. Synthetic gin. Wild parties. Silly flirtations. Jealousy. Quarrels. Lack of tact. Telling each other home truths. Perhaps if young couples realized how dangerous these things are, more of them would clamp down the emergency brakes on their tongues and keep to the middle of the road when they got to the perilous places in their married lives.

And if the matrimonial road had a few footnotes warning wives against being back-seat chauffeurs, and if it stressed the necessity of every married couple keeping the domestic machine well lubricated with the oil of flattery and their talk tank filled with the gas of interesting conversation, then, indeed, would it enable more husbands and wives to have a pleasant journey together and arrive safely at a contented and happy home, which all brides and grooms set out for, but few reach.

Sister Mary's Kitchen

There are several different types of plum puddings—rich, eggless, bread or cracker crumb, and graham or entire wheat flour.

The ages and tastes of her guests will enable the hostess to choose the pudding best suited to her needs. A rich plum pudding served with a rich sauce is not suitable for children, but the simple graham pudding can be given to them without danger of overtaxing small digestions.

GRAHAM PLUM PUDDING

Three tablespoons butter, 1/4 cup molasses, 1/4 cup milk, 1 egg, 1 cup graham flour, 1/2 cup white flour, 1/2 teaspoon soda, 1/2 teaspoon salt, 1/2 teaspoon cloves, 1/2 teaspoon nutmeg, 1/2 pound stoned dates, 2 teaspoons minced citron.

Melt butter, add molasses, milk and egg well beaten. Mix well and add graham flour. Mix and sift white flour, soda, salt and spices. Combine with chopped dates and citron. Mix thoroughly and add to batter. Beat hard for one minute and turn into a buttered mold. Cover and steam two and one-half hours. Serve with hard sauce for adults and liquid sauce with a garnish of whipped cream for children. Thanksgiving pudding is a traditional New England dessert not too rich for older children.

THANKSGIVING PUDDING

Four cups milk, 1 1/2 cups broken crackers, 4 tablespoons molasses, 1 cup sugar, 4 eggs, 1 teaspoon salt, 4 tablespoons melted butter, 1/2 teaspoon cinnamon, 1/2 teaspoon nutmeg, 1 1/2 cups "stoned" raisins.

Scald milk and pour over crackers. Let stand until cool. Parboil raisins in boiling water to cover until plump. Beat eggs slightly and add to crackers with sugar, molasses, salt, butter and spices. Mix well and add plumped raisins. Pour into a well-buttered baking dish and bake slowly for two and one-half hours. Stir twice during

first half hour, to prevent raisins from settling to the bottom of the dish. Serve with hard sauce or sterling sauce.

Diphtheria Can Be Eliminated By Proper Health Measures

By DR. MORRIS FISHER

Although scientific medicine knows the cause of diphtheria, a method of prevention through inoculation against the disease, and also has a specific antitoxin for treating severe cases, diphtheria has not been wiped out from the earth.

The reasons are many. The diphtheria germs pass easily from one person to another. It is possible for well people to carry the germs in their throats after they have recovered from the disease. The diphtheria carrier is a menace and is largely responsible for many cases of diphtheria.

The absence of the disease from certain communities in any considerable number of cases over long periods of time develops a careless attitude toward the condition, so that people neglect to take the measures that are available.

In this country the number of cases of diphtheria has decreased almost continuously since 1923, although in 1927 there was a sharp rise, explained by the fact that the diphtheria germs are living organisms and may vary in their virulence from time to time.

From October to January each year the number of cases of diphtheria increases, apparently associated with the coming of the change in the weather and also with the opening of the schools and the making of tremendous numbers of new contacts by children.

Recently the Health Section of the League of Nations made a complete survey of the diphtheria situation throughout the world. As a result of this survey, it is concluded that antitoxin can control the disease and that immunization against diphtheria by toxin-antitoxin or by anatoxin is efficient in developing resistance to the disease.

The battle is a difficult one, but the co-operation of the public is certain to yield successful results if the campaign is persistent.

To-morrow's Horoscope

THURSDAY, NOVEMBER 21

Benefic aspects rule to-day, according to astrology. It is a time for applying all one's best energies in business affairs. All the signs indicate tremendous success for banks and bankers and even greater extension of influence than they have previously attained.

Financiers are declared subject to a planetary government that enables them to underwrite tremendous enterprises not hitherto attempted in the history of the world. The stars prophesy for the United States engineering feats of magnitude and the transformation of many cities into centres of artistic beauty. Architects are under a direction of the stars most fortunate and most promising.

Many Americans will be employed in Europe, it is foretold, and fame and fortune will come to young women as well as young men. This is read as a lucky day for those who desire promotion or increase of salaries or wages. It is an auspicious time to seek positions and should bring reward to the ambitious. The stars promise foresight to those who plan his projects or contemplate widespread co-operation. Adversity, however, is promised for the President of the United States, who is to win wide fame through some progressive policy.

The stars seem to aid all who have attained success. Both men and women who occupy positions in the Sun should benefit under this configuration. There is a sign most favorable to constructive and progressive work of every sort. Engineers and builders are especially fortunate. Children born on this day probably will be vigorous, athletic and highly intelligent.

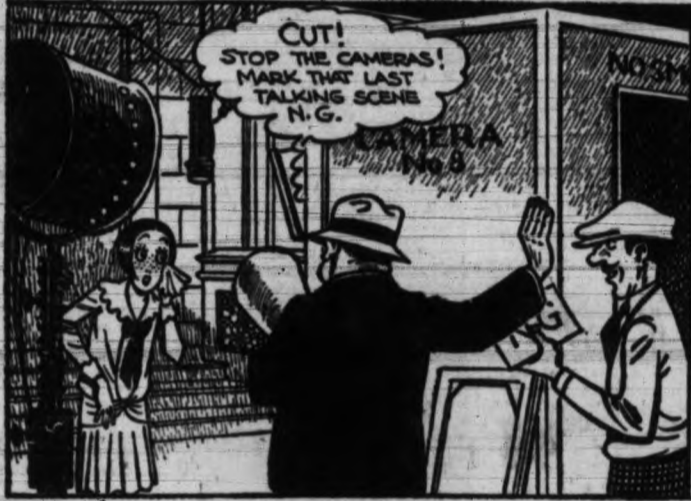

The subjects of this sign often excel in sports as well as business. Women to-day will find their greatest satisfaction in pursuing personal interests and avoiding public activities. Persons whose birthdays it is have the assurance of a year of real progress and success that is lasting. Betty Green, noted for her great wealth, was born on this day, 1835. It was the birthday of William Bartlett, 1841, famous artist, and Josiah Bartlett, 1728, signer of the Declaration of Independence.

Nanking, Nov. 20.—Ying Kuo, former Chinese vice-consul at San Francisco, and Mrs. Susie Ying Kuo, his wife, who recently were convicted here on a charge of attempting to smuggle opium worth \$500,000 into the United States, to-day took their case to the Scoochy court of appeal. Ying Kuo was given a seven-year sentence and fined \$3,000, and his wife was sentenced to four years and fined \$2,500.

Germany to Aid Stranded Mennonites

Berlin, Nov. 20.—The German Cabinet

has decided on making an approach to Russia concerning the more than 10,000 Mennonites of German descent who settled in Russia 100 years ago who are about to emigrate to America and Canada, particularly with reference to about 2,000 of the emigrants who are expected to be stranded near Moscow.

The German charge d'affaires at Moscow was instructed to intervene with the Russian authorities for the purpose of expediting the departure of the Mennonites to Germany. Yesterday the Cabinet decided to appropriate funds for the relief of these German farmers and appointed a member of the Reichstag as relief commissioner.

AT THE THEATRES

FASHIONABLE CAFE EMPLOYEES PLAY IN "LADY LIES"

The Park Lane, exclusive restaurant of New York's social register, contributed a head waiter, a caterer, two chefs and three waiters to provide authentic atmosphere for the fashionable restaurant scene in Paramount's all-talking picture, "The Lady Lies," which closes to-night at the Capitol Theatre.

The restaurant sequence shows Walter Huston and Claudette Colbert, who play the leading roles. Over the luncheon table begins the acquaintance which develops into the big love interest in the picture.

POWERFUL DRAMA MAKES "PHYSICIAN" OUTSTANDING PLAY

George Jacoby's production of Henry Arthur Jones' play, "The Physician," is showing at the Playhouse Theatre. It is thought by the critics to be even better than "The Fake," which established Miles Mander and Elsa Lanchester as well as the producer.

COLOR AND MUSIC GLORIFY ROMANTIC BACKSTAGE STORY

Glorious with color and music, the heart-throbbing romance of "The Lowland Wolf," which is the last time to-day, as the all-talking, all-singing, all-dancing motion picture masterpiece, "The Dance of Life," is shown.

Paramount has taken this absorbing romance of the intriguing and highly interesting burlesque "wheel" and given to it all the possibilities and advantages modern science and art have

contrived for the most perfect moving picture entertainment. Beautiful girls in lavish costumes, all photographed in color by the Technicolor process, and reproduced entirely with sound and dialogue, appear in the spectacular revue scenes. Contrast is supplied by the backstage scenes of the cheap burlesque theatre, with its "best-trust" chorus of women, none of whom weigh less than 180 pounds.

EMOTIONS ARE LEADING THEME

"The Lowland Wolf" Is Strong Story of Catalonia

When Angel Guimera, famous continental playwright, went to his native Catalonia for a story he hit upon a virile chapter of primitive human emotions in full play that promises to put his name among the immortals. He gave his story to the world in the form of a play called, in English, "The Lowland Wolf," and it has been chosen by Sir John Martin Harvey as one of his starring vehicles for his present Canadian tour. It comes to the Royal Victoria Theatre for the first three days of Sir John's week's engagement commencing last Monday, and in its first presentation before Canadian audiences will undoubtedly add lustre to the already great reputation of this great English actor.

Sebastian, landowner and employer of the village he rules, is "the lowland wolf." Maria, beautiful daughter of a villager, is his plaything. Facing the necessity of quieting village gossip on the eve of his marriage to an heiress from beyond his district, he fetches from the hills a shepherd, Manelich, to wed Maria. Within a few hours of the ceremony, Manelich, who has seldom before set eyes on womankind, and who brings from the hills a happy, boisterousness, has his suspicions aroused by the villagers who laugh at him, fully confirmed.

For the last three days of his week's engagement Sir John will portray for

JEAN HERSHOLT AS SOLOMON LEVY IN COLUMBIA FILM

Jean Hersholt has one of the best roles of his career in the picture of Anne Nichols' "Able's Irish Rose," which is the current attraction at the Columbia Theatre. Hersholt essays the role of Solomon Levy, the father of Able. This picture marks Hersholt's second appearance in a Paramount picture, the first being with Pola Negri in "The Secret Hour."

LORDS DEBATE BEAVERBROOK'S TRADE PLAN

Empire Free Trade Scheme Opposed in Britain's Second Chamber

London, Nov. 20. (By George Hambleton, Canadian Press Staff Correspondent).—The "Empire Free Trade Crusaders" brought their campaign to the fore in the House of Lords last night through the agency of Lord Beaverbrook, chief proponent of the principle. But the Labor Government, represented in the House by Lord Arnold, Paymaster-General, proved entirely unsympathetic and Lord Beaverbrook encountered opposition also from a number of Conservative peers.

Through The London Daily Express Lord Beaverbrook has been pushing the idea of Empire free trade for many months. Last night Lord Beaverbrook asserted his plan did not involve any taxation on foodstuffs from outside the Empire, though Lord Arnold declared it necessarily meant erection of tariff barriers against all countries outside the Empire.

Lord Beaverbrook also declared his policy was designed to develop the resources and industries of the Dominions to the fullest extent. He said it would make the whole Empire one economic unit. He believed the Dominions would fall in line with the proposal.

DECLARED UNWORKABLE
Lord Arnold said Lord Beaverbrook's own exposition of the plan, contained in a booklet he had published, showed it was unworkable, in that it called for protection for certain key industries and declared import duties imposed solely for revenue purposes should not be touched. He pointed out the Government was calling an Empire economic conference at the earliest opportunity. When means of increasing intra-Empire trade would be considered with representatives of all the Dominions.

Lord Bledisloe, the greatest exponent of farmers' interests in this country, could see nothing in the plan to benefit the farmers.

Lord Beauchamp, Liberal leader in the House of Lords, suggested Lord Beaverbrook should first persuade the people of the Dominions before attempting any forward step in Great Britain.

MINDS MADE UP
The Manchester Guardian says the debate made in plain the Conservatives had "reluctantly made up their minds that Empire free trade will be just as unpopular as tariff reform or safer
